Gulfood returns to celebrate landmark 30th edition

Dubai World Trade Centre (DWTC) is geared up to celebrate the return of Gulfood for its 30th edition under the theme 'The Next Frontier in Food'. The event will focus on the future of global food commerce and international food systems, setting the stage for cross-industry knowledge transfer and networking opportunities. As the largest edition to date, Gulfood 2025 will display more than 1 million products from over 5,500 exhibitors spanning 129 countries featuring large multinationals to start-up food ventures. Visitors can explore 24 enormous exhibition halls covering over 1.3 million square feet while interacting with companies launching new products, ingredients, and flavours, showcasing their culinary expertise and engaging in commercial trade deals. Visitors can also engage in Gulfood Discovery Tours - a line-up of curated sector-themed tours offering an immersive experience highlighting global food trends and innovations on the show floor.

17-21 FEB 2025 | DUBAI WORLD TRADE CENTRE

Gulfood 2025 will launch the inaugural Food500 Summit, welcoming global F&B leaders and decision-makers including CEOs, Heads of State, trade officials, investors, academia, scientists, tech innovators and more under one roof to discuss key issues on international trade, investment strategies, trends, growth opportunities, AI driven transformation, legislation, environmental concerns, health and wellbeing and the socioeconomic challenges impacting global food security. The Top Table programme, sponsored by the Japan External Trade Organisation (JETRO), returns under the theme "Culinary Futurism," exploring the evolution of dining and food culture over the next decade. Dubai World Cuisine, a dedicated segment of the event, will see UAE-based chefs collaborate with global culinary icons to host exclusive four- and six-hands dinners across Dubai, reinforcing the city's status as a global gastronomy hub. Pavilions will also exhibit including the USA, France, Brazil, UK, India, Singapore, Japan and Australia, as well as first-time exhibiting companies from Kosovo, Madagascar, Mauritius and Zambia. This time, a new global chapter is unfolding in the future of food, and it's within the legacy of Gulfood that the world can anticipate a seismic impact.

JABS INTERNATIONAL PVT. LTD.

World's leading trading house of spices and agro commodities

Since spices are the important ingredient of every meal, they must be consumed hygienically. So JABS swore on the day they launched their business to provide world with the best of spices and agro commodities. JABS International, incorporated in 1983, is a Government recognised Four Star Export House dealing in Spices, Oilseeds, Raisins, Herbs, Pulses & other Agro commodities. With its client base worldwide, JABS spreads fragrances of Indian Spices across the world. The company has superb export network, updated & modern equipments that have made them a leader in exports. Jabs International Pvt. Ltd. believes in honest and transparent vision in business and puts Quality before Quantity. The company is one of the few spice exporters in India to offer and export spices conforming to the important physical and microbiological parameters set as per international standards. JABS is also registered with APMC Unjha for its procurement, directly from farmers. JABS has recently ventured into ICS for procurement of Organic material directly from farmers. JABS is a member of almost all the federations formed with the intention of working for the betterment of Importers and Exports from India.

Man behind the tremendous success of JABS:

The man behind the phenomenal success of JABS is Mr. Bhaskar B. Shah, who has more than 36 years of experience in the field of exports. Mr. Bhaskar Shah started with a small trading firm of spices. Today, under the guidance and direction of Mr. Bhaskar Shah, Managing Director, JABS International Pvt. Ltd., the company has achieved remarkable growth and team has won awards every year for past 25 years for exports from India under various categories. Mr. Bhaskar Shah is the sole figure responsible for opening new avenues for Indian Exporters in respect of standardisation of product, quality control and commitment to the customers. He is ably supported by highly qualified management personnel in the administrative-technical set-up & highly skilled & dedicated team of technicians and workers at respective levels of production & processes. Mr. Bhaskar Shah is a known name in Spices as well as Commodity trade community. He as a Managing Director of the company, keeps inspiring his staff by keeping a personal touch with each and every member of his staff.

Awards & Recognition:

Mr. Bhaskar Shah has chaired the Spice Board of India under Commerce and Industry Ministry as a Vice Chairman for 2 terms. Thus, he represented Spices fraternity in the Indian Government. He was also the Chairman of ISFEA for 6 years. Mr. Bhaskar Shah received an award for Excellence in Export for the year 1997-98 from the Government of India and he was awarded by then Prime Minister Shri Atal Bihari Vajpayee ji. It has been a continuous inflow of awards, from IOPEPC for Highest exports from India of Sesame seed and Niger Seed. From FIEO, FISS for Highest exports from India of Cumin Seed, Fenugreek Seed and many other products. On

National Award given by The Prime Minister Shri Atal Bihari Vajpayee for the Excellency in Exports to Mr. Bhaskar Shah on 21/1/1999 for the year 1997-1998

The Certificate of Honour for Export Achievement for Year 1996 - 1997, Awarded by Commerce Minister Shri B.B. Ramaiah Dated 6-10-1997

Presentation of Trophies and Awards for Excellence in Export of Spices (2000-01 and 2001-02) to Shri Bhaskar Shah by Shri Dipak Chatterjee, IAS Commerce Sec. Govt. of India. Dt: 03/01/2003

personal level, Mr. Bhaskar Shah was awarded Jewel of Navi Mumbai by IMC Navi Mumbai Wing. He was also awarded with 'Lifetime Achievement Award' by Federation of Indian Spice Stakeholders (FISS). As a company JABS International Pvt. Ltd. must have won more than 100 awards from various renowned associations and even from the Government of India. Mr. Shah, himself must have earned at least 25 various awards.

Product Range:

The company offers its customers the widest range of products which include Spices (Cumin, Fennel, Ajwain, Curry Leaf, Chilli, Fenugreek, Dill Seed, Cardamom, Garlic, Nutmeg, Turmeric, Black Pepper, Paprika, Cinnamon (Cassia), Bay Leaf (Tejpatta), Celery Seeds, Coriander, Mustard, Ginger, Tamarind, Black Cumin etc); Oilseeds (White Sesame, Toasted Sesame, Hulled Sesame, Black Sesame, Niger Seeds, Safflower Seeds, Groundnut Seed, Sunflower Seed etc.); Herbs, Raisins, Pulses & Beans (Chana Dal, Green Mung, Urad Dal Gota, Red Masoor, Mung Dal, Chickpeas, Black Lentil, Chickpeas (Black), Broad Beans, Urad Dal Chilka, Toor Lemon, Toor Dal, Urad dal spilt, Laird Lentils, Black Kidney Beans, Light Kidney Beans, Purple Kidney Beans, White Kidney Beans, Red Kidney Beans, Black Eye Beans, Small Kidney Beans, Yellow Kidney Beans, Cow Beans, Dark Red Beans, Green Peas, Soyabean etc.); Agricultural Commodities (Maize, Rice, Wheat, Millet, Sorghum, Onion Fresh, Dehydrated Onion, Dehydrated Garlic).

State-of-the-art Infrastructure:

As far as infrastructure is concerned, the company has main factory at Navi-Mumbai with state-of-art machinery undertaking various production processes, enabling them to give finished products adhering to the required international quality standards. The company has 3 manufacturing units across India and is setting up 4th unit in Guntur, Andhra Pradesh. With its head office and a manufacturing unit at Mahape, Navi Mumbai, it has a huge set up at Unjha, Gujarat and at a strategic location Mundra (port city) in Gujarat. The company also has processing units at Mundra & Unjha in Gujarat, and at Warangal in Andhra Pradesh. Their quality control norms include obtaining reports from internationally bench-marked laboratories regarding their products. Apart from this, they also have strong ties with their suppliers, who themselves have several years of experience and their factories are solely occupied with serving quality products to consumers. Being in international business, JABS has got international standard accreditations like ISO, HASAP, HALAL and even the BRC. For quality control and testing JABS has an in-house Lab at its Mumbai and Unjha units.

Global presence:

Maintaining a regular financial track record, JABS has been a contributor to the Foreign Exchange Kitty of the Government of

India. JABS makes its presence felt worldwide by participating in all possible international spice exhibitions, may it be Gulfood (Dubai), SIAL (Middle East), Anuga (Cologne) and so on. JABS has a highly qualified and experienced Technical as well as Management team, because of which JABS has been handling huge volumes of exports across the world for years. Being a financially strong company, JABS is able to survive as a wholesale spices exporter for so many years. "MyTaste", "SunSmile", "Farm Pearl" and "Season Pearl" are few registered brands under JABS. The company has customers across more than 50 countries worldwide including USA, Australia, UAE, Singapore, Canada etc.

Itachi Food Products Co. L.L.C

Assures quality products with timely delivery

Itachi Food Products Co. L.L.C is one of the premium international trading companies of UAE, which put their range of skills and competencies for facilitating the foods and beverages import/export process to different parts of the world in an efficient and safe manner. Established in 2020 in United Arab Emirates, Itachi Food Products Co LLC, is one of the leading importers and exporters of Middle East, Africa, EU, USA and worldwide. The company began as a wholesale dealer in Al Ras, Dubai, UAE. Over the past five years, they have expanded our horizons progressively, diversifying by exporting rice to different countries, such as Saudi, Oman, Qatar, Bahrain, Turkey, Sudan, Yemen, Benin, Senegal, Mali, Guinea Conakry and USA. The company's brand popularly known as **"Mr. KABIR"** is specialized in various rice like 1121 (steam sella golden) Basmati, PR 11 (steam golden sella), Sona Masoori White Rice, IR-64 rice. Under the umbrella of Itachi Food Products Co LLC, we have our sister concern by the name of Modern Agro International FZ- LLC which was established in 2015.

Leadership:

Itachi Food Products Co. L.L.C is headed by Mr. Ajay Kumar Gupta who has experience of over 20 years. His ability to implement internationally best practices across the company is driven by a team of qualified experienced managers, guided by General Managers and Managing Directors. The management is overseen by a Board of Directors supported by an advisory board of non-executive professionals. Mr. Ajay Kumar Gupta over the past 20 years has built the foundation for a sustainable

Mr. AJAY GUPTA
Managing Director

company, which has thrived through a full range of business and has grown to be one of the top 50 Rice companies in the GCC. They are proud of living up to their corporate image as a beautiful Company preparing for a new entrepreneurial take off, fulfilling corporate social responsibility and contributing to society.

Mr. Huge Clientele & International Standards :

We have been very aggressively growing as a company globally. In addition, we are seeking and developing new markets, products and opportunities, locating potential customers and making it easier to do business. Its global delivery model helps it deliver timely, high quality, products with immense cost savings compared with in-house and other outsourced products. High quality performance can be assessed by the fact that more than 70% of its business is from repeat clients. All our clients consider us a part of our in-house team.

In comparison with in-house and other outsourced products, we usually deliver the desired products at a lower cost and in lesser time. Itachi Food Products Co. L.L.C manages its companies according to the highest international standards such as ISO, HACCP, GMP, HALAL, FDA, SFDA, KOSHAR and Environmental Management System standards.

Shafena Agri Foodstuff Trading Co. LLC

a Global Leader in Agricultural Commodities

Shabbir Africawala

Operating from its headquarters in Dubai, UAE, Shafena Agri Foodstuff Trading Co. LLC is a premier trading company specializing in the import and export of high-quality agricultural commodities. With a focus on providing the finest beans, pulses, spices, seeds, and nuts, Shafena has established itself as a trusted name in the global agricultural trade. Under the able leadership of Mr. Shabbir Africawala as Managing Director, Shafena Agri Foodstuff boasts a diverse and extensive trading network. Its partners span across major markets including North & South America, Australia, Europe, the Middle East, South East Asia and Africa, reflecting the company's global footprint and commitment to fostering international trade relationships. The company continues to bridge global markets with its robust trading network, offering unmatched reliability and excellence in agricultural products.

Product Portfolio:

The company's wide array of products includes: Beans and Pulses: A variety of high-quality legumes such as Green Moong Beans, Desi Chickpeas, Soyabeans, Red lentils, Kabuli Chickpeas etc. are sourced from reliable producers; Spices: A

vibrant selection of aromatic spices to suit diverse culinary needs. The company also offers Seeds and Nuts such as Dry Fruits and Desiccated Coconut which are premium quality items and ensure freshness and nutritional value. Thanks to East African roots, the company has exponentially expanded into African spices / beans such as Cloves, Ginger, Black pepper, Bird eye chillies, Turmeric, Long Pepper, Green Moong, Cowpeas, White & red beans, Pinto beans, Creamy beans, Black Beans, Soyabeans etc.

Commitment to Quality and Service:

Shafena Agri Foodstuff Trading prides itself on its unwavering commitment to quality, timely delivery, and exceptional customer service. By aligning with trusted suppliers and implementing stringent quality checks, the company ensures that every product meets the expectations of its global clientele. With its dedication to quality and customer satisfaction, the company remains a key player in the ever-expanding agricultural trade industry. At its heart, Shafena is about more than just

trade. It's about delivering the finest agricultural products to meet the diverse needs of its customers. They have gained a reputable position in the field of supplying and exporting a wide array of products due to their strict adherence on quality. Their team overlooks the procurement of raw material, cleans and packs under supervision according to international export standards.

Customers' satisfaction is priority:

With company's ethical business practices and focused approach, they have earned the trust of innumerable clients across the globe. All their efforts are directed towards achieving maximum client satisfaction keeping in mind the quality, competitive offers and above all the service. They strive hard to meet the buyer demand from beginning to end. Whether it's pulses for your kitchen, aromatic spices to enhance flavours, or premium seeds and nuts for healthy snacking, their goal is to create a seamless trading experience that benefits everyone in the supply chain. They boast of a modestly niche portfolio of clientele whom they support through regular market updates, inputs and other valuable information. With a thorough experience in this field of Agri commodities, the company foresees a good potential to expand their activities in the coming years due to constant rise in the demand from various countries.

We are pleased to offer you the opportunity to company every issue cover the Bio Energy bio energy company input coverage exhibitor interview, speaker interview, delegate interview and insight highlights of the events. This is a unique chance to showcase your products and services to a wide and engaged readership, ensuring maximum visibility and impact. In addition to advertising opportunities, we also offer subscription plans to keep you updated with the latest trends and developments in the bioenergy industry: Subscribing to Bio Energy Times ensures you stay informed about industry news, breakthroughs, and expert insights that can help you stay ahead of the curve. We look forward to the possibility of featuring in BET magazine and discussing how we can best serve your advertising and

India Bio Energy Sector premier magazine

Message from CEO & FOUNDER

MR. BALRAM GUPTA
CEO & FOUNDER

With Bio Energy Times Magazine, one gets a unique chance to showcase your products and services to a wide and engaged readership, ensuring maximum visibility and impact. In addition to advertising opportunities, we also offer subscription plans to keep you updated with the latest trends and developments in the bioenergy industry: Subscribing to Bio Energy Times ensures you stay informed about industry news, breakthroughs, and expert insights that can help you stay ahead of the curve. We look forward to the possibility of featuring in BET magazine and discussing how we can best serve your advertising and informational needs.

informational needs. Our Launches go to below link—

Encouraging Women's Entrepreneurship in Bioenergy

More and more women should become entrepreneurs in the realm of bioenergy business as through this they can not only be enabling their economic independence and contribute towards their country's economic growth but also contribute to the sustainability of the planet. As natural care givers and nurturers, women are ideally suited to nurture the health of our planet for the future generations.

However, women led start-ups in India face massive challenges in generating seed money. It seems our financial institutions do not trust women entrepreneurs that much unless they had already made a name for themselves.

It is disappointing to note that according to a report by WinPe, a non-profit organisation focused on gender diversity in private equity, the share of venture capital funding going to female founders in India plummeted to 9.3 percent in 2023, which was much less as compared to even the already less 14.7 percent in 2021. This scenario calls for an urgent change.

The lack of funding is I think is one of the major reasons impeding the huge potential of women's entrepreneurship in the bioenergy sector in India to translate into reality.

Ankita Tiwari, Project Director of Bionenergy India and Senior Associate Editor of Bioenergy Times, receives the BET Excellence award from Balram Gupta, Editor-in-Chief of Bioenergy Times

The Union and the state governments and the corporate sector should provide a facilitative environment towards women led businesses in India's bioenergy sector through land concessions, loans in easy terms, etc.

and media should also highlight the achievements of women entrepreneurs in the bioenergy business so as to encourage the future generation of women entrepreneurs.

A MONTHLY PUBLICATION DEDICATED THE LATEST ADVANCEMENTS, TRENDS AND INNOVATIONS IN BIOENERGY

Bioenergy Global 2025 to be held during 29-30-31 July 2025 at IICC Yashobhoomi in New Delhi (India)

Meera Trade Fair Media Pvt. Ltd. is delighted to announce the inaugural edition of 1st Bioenergy Global Summit and 3rd edition of NCBI - the premier events for India's bioenergy sector! Both the events would be held at India International Convention & Expo Centre (Yashobhoomi), Dwarka, New Delhi, India, during 29th-31st July, and these events will be part of the mega event titled BioEnergy Global 2025. BioEnergy Global will bring together companies, policymakers, manufacturers, and developers to showcase their innovative ideas, discuss key industry trends, and foster collaborations to accelerate growth of bioenergy on a global scale. Join us on December 29th-31st July 2025, at the IICC (Yashobhoomi), Dwarka, New Delhi.

The goal is to focus on the bioenergy sector, sugar, ethanol, oil, natural gas and agricultural equipment industries. Bioenergy Global Summit and NCBI (National Conference on Bioenergy India) will offer opportunities to explore new technologies, network with industry leaders, and drive progress towards a cleaner, greener future through bioenergy. By exhibiting at BioEnergy Global you will be positioned at the forefront of innovation and sustainability, which can help you reach a highly targeted audience of decision-makers and professionals from sectors like bioenergy, sugar, natural gas, ethanol, and agriculture. Here you can showcase your products, services, and technologies to over 20000 professionals and 400+ exhibitors focused on achieving net-zero carbon emissions.

Delegates' Visitors Profile:

- Government & Policymakers: Involved in shaping policies in bioenergy,

agriculture, and other forms of renewable energy.

- Business Leaders: CEOs and key executives investing in sustainable technologies.
- Technical Experts: Engineers and researchers driving advancements in bioenergy.
- Sustainability Advocates: Those who are advocating for a global shift toward sustainability.
- Innovators: Those who have created, or are creating or wanting to create some new idea/s or development/s in the domain of renewable energy.

Exhibitors' Profile :

- Bioenergy: Leaders in biofuel, biomass, biogas
- Sugar and Ethanol Industry: Ethanol producers, sugarcane suppliers and suppliers of machinery pertaining to bioenergy.
- Bio Refineries & Chemical Industry : Leading innovators in biofuel and biochemicals & refineries technology.
- Oil & Natural Gas: Players in LNG, CNG,

and biofuel, and oil and biogas sector.

- Agricultural Equipment: Farm machinery manufacturers supporting bioenergy solutions for bio fertilisers

Highlights :

- 400+ Exhibitors' Participation- Showcasing the latest innovations in bioenergy and other forms of sustainability.
- 20000+ Bioenergy Industry Professionals networking and collaborating.
- 1000+ Key Bioenergy Industry Decision Makers
- 25+ Conference Sessions addressing and discussing on bioenergy and other sustainability issues and opportunities
- 20+ Countries' Participation
- 2000+ Conference Delegates
- 150+ Conference Speakers at 3rd NCBI and at Bioenergy Global Summit 2025
- 100+ BET Excellence Awards to players in the bioenergy sector
- 100+ Top CEOs Meet on 31st July 2025
- Release of a Book Covering 100+ Top CEOs in Bioenergy Sector

AI Driven Sustainable Packaging

Dr. Tanweer Alam and Dr. Priti Khemariya
Indian Institute of Packaging, Delhi

Dr. Tanweer Alam
Additional Director
Indian Institute of
Packaging (IIP)

Introduction: Sustainable packaging is crucial for ecommerce companies, as environmental pollution from packaging materials is increasing. Artificial intelligence can help companies optimize material selection, design, packaging, and inventory management, enabling data-driven decisions for eco-friendly, efficient, and cost-effective packaging solutions.

The implementation of AI in sustainable packaging is transforming the industry by optimizing materials, reducing waste, and enhancing supply chain efficiency. AI-driven simulations and material optimization techniques help identify eco-friendly alternatives, such as biodegradable or recyclable materials, without compromising strength and durability. These technologies leverage advanced algorithms to analyze material properties, simulate performance, and identify the most sustainable options. AI-powered simulations allow companies to test packaging materials virtually, assessing their strength, flexibility, and environmental impact before physical production. This reduces trial-and-error processes, saving time, resources, and waste. Additionally, AI can recommend lightweight materials and innovative design structures that use fewer resources while maintaining durability and product protection.

Machine learning algorithms: Machine learning models analyze vast datasets, including material compositions, degradation rates, and lifecycle assessments, to propose optimal combinations of

biodegradable, compostable, or recyclable materials. Furthermore, generative design algorithms powered by AI can create packaging solutions that minimize excess material use, reduce carbon footprints, and optimize supply chain efficiency. These technologies also help manufacturers comply with sustainability regulations by ensuring selected materials meet environmental standards and industry requirements. By integrating AI-driven simulations and material optimization techniques, businesses can achieve significant reductions in packaging waste, lower production costs, and contribute to a more sustainable future.

Machine learning algorithms play a pivotal role in advancing sustainable packaging by optimizing design, material selection, and waste reduction strategies. These algorithms analyze vast datasets to identify patterns and correlations that human analysis might overlook, enabling smarter decision-making for eco-friendly packaging solutions. Machine learning applications in sustainable packaging include material optimization, design enhancement, and demand forecasting. Algorithms assess properties such as biodegradability, recyclability, and durability to recommend sustainable alternatives without compromising functionality. Neural networks and decision trees analyze historical data to predict material performance and environmental impact, helping manufacturers choose the right materials for specific applications.

In design optimization, generative design models explore countless design possibilities to create packaging that minimizes material usage while maximizing structural integrity and aesthetic appeal. This leads to lightweight and resource-efficient packaging solutions that reduce waste and energy consumption during production and transportation. Additionally, machine learning enhances predictive analytics, enabling companies to forecast demand more accurately, thereby avoiding overproduction and excess packaging waste.

AI-powered image recognition algorithms are transforming recycling processes by improving waste sorting systems. These systems can accurately identify and separate different types of packaging materials, increasing recycling rates and reducing landfill waste. Reinforcement learning techniques optimize packaging supply chains by recommending strategies to reduce carbon footprints, such as selecting the most efficient transportation routes and minimizing packaging redundancies. Machine learning also aids in consumer behavior analysis, helping companies develop sustainable packaging solutions that align with market demands.

Predictive Modeling: AI-driven predictive modeling of natural fibers optimizes material properties, enhances performance, and reduces environmental impact. Natural fibers such as hemp, jute, bamboo, and kenaf offer biodegradable and renewable alternatives to conventional packaging materials, but their variability poses challenges in achieving consistent performance. Predictive modeling analyzes vast datasets related to fiber composition, processing methods, and environmental conditions to forecast their behavior and suitability for packaging applications. Machine learning algorithms process historical data to predict key fiber characteristics such as tensile strength, flexibility, moisture resistance, and biodegradability, enabling manufacturers to tailor fiber blends and processing techniques for optimal packaging properties.

Computational Simulations: By utilizing computational simulations, companies can virtually test different fiber formulations and optimize packaging designs without extensive physical prototyping. Predictive models aid in quality control, supply chain optimization, and regulatory compliance, ensuring sustainable and cost-effective packaging solutions.

Smart Packaging Design: AI-powered smart design enables manufacturers to create efficient, eco-friendly, and cost-effective packaging solutions. Generative design algorithms analyze product dimensions, weight, fragility, and transportation conditions to generate packaging structures that use minimal material while providing adequate protection. These AI systems create lightweight designs that reduce material consumption, lower transportation emissions, and enhance recyclability. Additionally, AI identifies opportunities for using eco-friendly materials by evaluating their properties and performance in real-world conditions.

Smart packaging solutions enabled by AI contribute to consumer engagement and education, offering features such as QR codes and IoT-enabled tracking, which provide real-time information about packaging sustainability, recycling instructions, and product lifecycle tracking. AI-powered image recognition and quality control systems ensure precision in packaging production, reducing errors and material wastage.

Recycling Systems: AI-powered recycling systems enhance the efficiency and accuracy of sorting, processing, and recycling packaging materials. Technologies such as machine learning, computer vision, and robotics identify, separate, and process various packaging materials, ensuring higher recycling rates and reducing landfill waste. Computer vision-based sorting systems

analyze packaging waste on conveyor belts in real time, distinguishing between different materials by detecting color, texture, and unique identifiers. Machine learning algorithms optimize sorting processes, predict equipment failures, and provide insights into waste composition patterns.

Robotic Process Automation: AI-driven robotic process automation (RPA) transforms sustainable packaging by streamlining production processes, reducing material waste, and enhancing efficiency. AI-powered RPA systems optimize packaging design, material usage, and end-of-life recycling processes. These systems dynamically adjust operations based on real-time data, ensuring only necessary materials are used, thereby reducing scrap and improving sustainability metrics. In quality control, AI-enhanced RPA systems inspect packaging products for defects, minimizing waste and ensuring higher sustainability standards.

Challenges with AI-powered Sustainable Packaging: Ecommerce companies face challenges in implementing AI-powered sustainable packaging. Despite challenges such as high initial investment costs, skilled personnel, data availability, and regulatory compliance, integrating AI into sustainable packaging initiatives offers significant cost savings, reduced environmental footprints, and stronger brand reputations. As AI continues to evolve, it presents immense potential to drive innovation in sustainable packaging, supporting a circular economy and contributing to a greener future. To transition smoothly, one must strategically invest in training, partner with technology providers, and focus on long-term benefits.

Conclusion: AI integration in ecommerce packaging presents a promising future for sustainable solutions. As technology evolves, AI applications can minimize environmental impact and make sustainable packaging more accessible and economically viable. As consumer demand for eco-friendly practices increases, AI adoption in sustainable packaging will become a benchmark for success in the ecommerce industry. AI-powered sustainable packaging solutions will meet consumer expectations and remain competitive, making companies well-positioned for success in a world increasingly valuing environmental sustainability.

Pearl Line Trading LLC

specialized in food trading and ace supplier of green cardamom

SPICES • DRY FRUITS • BEANS • PULSES • RICE • SUGAR • CANNED FOODS

CHETAN KANAKRAI BHATT
(Director)

KUSHAL BHATT
(Director)

We are also representative of 'Emperor Akbar' brand in Iran, Dubai and other Middle East countries.

International Famous Green Cardamom Agent Pearl Line Trading LLC Represents 'Elephant' Brand Monte De Oro Guatemalan Green Cardamoms Since 30 Years.

IMPORTERS | EXPORTERS | INDENTORS

It is rightly said that hard work and experience pays off as it goes well with Pearl Line Trading LLC, a company established in 1996 in Dubai, UAE. With passing time, the company has become leading supplier of commodities such as spices, pulses, lentils, dry-fruits, rice, tea, coffee beans, cereals, sugar, canned foods and green cardamom (known as elaichi in Asian countries and Hail in Arabic) being the main product from India and Guatemala. Mr. Chetan K. Bhatt as Director has nurtured the company since its inception. He possesses vast experience in FMCG industry followed by two years (1983-1984) of learning in United Kingdom. Moreover, his son Mr. Kushal Bhatt as Director of the company is taking care of Marketing Department through his skills and comprehensive knowledge. None the less, the company has great team which includes Mr. Prashanth Eldhi who handles Administration and day-to-day functioning and many others who work hard for the organization.

The company is specialized in dealing in green cardamoms from Guatemala and India. The company represents famous brands like "Elephant" brand of Monte De Oro which is famous for its quality controlling, grading, packing and shipments with sophisticated technology. The brand is world class supplier and processor of green cardamoms, cardamom oil and decorticated cardamom seeds. Along with this, company also represents other brands of green cardamoms from Guatemala as per the requirements in the gulf region/Asian markets from the various clients. Presently, Pearl Line trading is very active in selling Indian green cardamoms,

representing a famous Indian brand "Emperor Akbar" of Samex Agency who is very particular in quality, elegant packing, shipments etc. They represent this brand in Iran, Dubai and other Middle East countries and it's very famous amongst good quality cardamoms Exporters. Recently, Mr. Chetan Bhatt told that "Out of all companies, the company which was awarded the best sales award is Monte De Oro, Elephant brand green cardamom suppliers from Guatemala".

Besides being excellent suppliers, the company has a success story of promoting of pulses in Myanmar. It can offer all kind of pulses and processed dals from Myanmar, Africa etc. As far as vision and mission of Pearl Line Trading LLC is concerned, it aims its expansion into new markets, development of new products to meet emerging consumer demands and any re-organization of projects which will help the company to achieve future goals. The company works constantly to understand the demand and consumption scenario of the market and thus the company has bagged awards because of its professionalism. Mr. Bhatt added that "After a brief setback in 2020 and 2021, during the pandemic period, we aim to revive the business slowly and steadily. We aim to try and give added value to existing products and to add new products that would scale our company to new heights. Well, covid times have been very challenging for everyone and it's no different for the products I have been dealing with. But the demand is stable now and with a growing market for F&B and ready to eat products, I am very optimistic about this market."

K. S. OVERSEAS PVT. LTD.

PROVIDES COMPLETE RANGE OF PREMIUM 521 FOOD PRODUCTS

K. S. Overseas Pvt. Ltd. -A Govt. Of India Recognized TWO STAR EXPORT HOUSE & one of the India's best manufacturers with their well renowned brand "521" food products, has established itself as a leading supplier of high-quality food products.

The company has established themselves as legend producers and exporters of premium quality Basmati Rice in the world. India's rice procurement 5% up at 41.6 million tonnes till Jan 31

Rice purchase by the Food Corporation of India (FCI) for the Central Pool stock during the October 2024-January 2025 period was 41.591 million tonnes (mt), up by 4.6 percent from 39.747 mt in the year-ago period. Experts say the procurement is ample to tackle any unforeseen eventuality amid concerns over climate change. However, the government is finding it difficult to manage the bulging stock amid no permanent offtake policy. Meanwhile, the Centre in January raised the target of kharif rice procurement, which begins in October, after Karnataka informed it that it could buy 0.5 mt for the Central Pool against the earlier target of 0.15 mt. However, no grain has been bought so far by the state. The revised all-India rice purchase target is 49.561 mt against 49.211 mt earlier from the kharif-grown crop. Procurement in Punjab, Haryana and other Northern states was completed in December while it will continue until end of February in Uttar Pradesh.

The Food Corporation of India (FCI) has been able to buy 11.631 mt in Punjab, which is 6.4 percent lower from last year's 12.431 mt. And in Haryana, it is 3.599 mt against 3.949 mt in 2023-24. The

target in Punjab was 12.4 mt and in Haryana it was 4 mt in the 2024-25 marketing year. According to latest data, rice procurement in Chhattisgarh has been reported at 7 mt as targeted until January 31, which is 15 percent higher from 6.097 mt a year ago as the State pays bonus over and above the paddy MSP of 72,325/quintal. Last year, the FCI took over extra quantity purchased by the State after the season got over and as a result the final procurement was 8.3 mt, officials said. Telangana's rice purchase is up by 13 percent at 3.574 mt from 3.165 mt, Uttar Pradesh has reported 7 percent higher procurement at 3.622 mt from 3.396 mt, and Madhya Pradesh has seen a 3 percent surge at 2.916 mt from 2.823 mt. But it is lower by 2.4 percent in Maharashtra at 0.564 mt from 0.578 mt. The Agriculture Ministry has estimated the kharif rice production to reach a record 119.93 mt in 2024-25 from 113.26 mt year-ago, up by 6 percent.

AGS FOODS INDIA PVT. LTD.

A global food products supplier with experience of over 3 decades

AGS Foods India Pvt. Ltd (A Govt. Recognized Three ★★ ★ Star Export House) is your gateway to premium agricultural commodities from India. The company was incorporated in the year 2016 under the guidance of Mr. Piyush Garg and with a legacy spanning over 30 years. Specializing in high-quality Basmati and Non-Basmati rice, they have established themselves as a reliable partner for businesses around the globe. The journey began under the name Agrawal Global Services in 1994, where they focused on sourcing and supplying agricultural commodities. Today, with a global footprint and presence in Asia, Africa, Middle East & GCC countries, they continue to serve clients with unmatched dedication to quality and customer satisfaction. Driven by a commitment to sustain ability, ethical practices and innovation, AGS Foods has presence in 45 countries. They majorly trade on CIF basis. With experience of over 3 decades, they have established themselves as a trusted provider of top-grade Indian Rice Varieties, Pulses and Spices. At AGS Foods India Pvt. Ltd, they understand the importance of sourcing premium agricultural products to meet the demands of your business.

The company has its head office at Indore, Madhya Pradesh, India which is called largest soya belt of India. The company is a global food ingredients supplier. They offer high quality, nutritious and wholesale products tailored to customers' specific requirements. Since their inception, they have been dedicated to provide unique food solutions, proven through extensive research and commitment to develop and implement long-term solutions for the world market. What stands them apart is their presence in India, as well as their associate offices located in Singapore, Benin, Madagascar, Mozambique and Dubai.

Mr. Piyush Garg
Director
AGS FOODS INDIA PVT. LTD.

Leadership behind the success of company:

Late Mr. Priyank Agrawal was the Founder of the company. Mr. Piyush Garg is the Director of AGS Foods India P. Ltd. He holds Master of Business Administration degree from University of Indore. He started his professional career at the age of 18. He has an experience of more than 18 years in Agri Commodities Sector. He is entrusted with the responsibility of looking after the overall management and marketing of the Company. Mr. Piyush Garg believes in his potential and has ability to beat obstacles. Under his direction, a business is built on the determination to develop strong, close and lasting relationships with customers and suppliers and to provide them with premium service and choice. Mr. Piyush's innovative approach and exceptional leadership skills have significantly contributed to the company's success, making it a go-to choice for clients seeking qualitative food products.

Vision & Mission:

The longest journey starts with a single step & this is how it has been with Agrawal Global Services. Their mission is to continuously research and refine production of nutritional soy-based foods to provide the best quality for a discerning consumer group. This will enable not only them and their partners but also the community at large to enjoy a higher quality of life, with meaning and prosperity. The company is socially responsible employing the highest ethical food standards in the industry. Today they supply a wide range of ingredients from soya to spices and other commodities to some of the world's largest food and beverage companies. The company's objective is to become a recognized leader in Agro Products and Spices products in all markets where they operate. They are committed to sustainable and ethical farming practices. By partnering with them, you're not only getting exceptional products but also contributing to a more sustainable agricultural ecosystem.

Diverse range of products:

The company's offerings are a celebration of the rich culinary heritage of India. From the fragrant Basmati rice to the diverse range of spices, their commodities promise to add depth, aroma, and flavor to every dish. AGS Foods India P. Ltd. has a wide range of products which includes Wheat products (Maida, Semolina and Chakki Atta); Soya Products (Organic Soybeans, Soya Chunks, Soya Flakes, Soya Flour); Rice (Basmati and Non-basmati); Spices (Fenugreek seed, fennel seeds, mustard seed, coriander seed); Oilseeds (Soybeans, Flaxseeds, Peanuts, Rapeseed); Sugar;

Pulses (Chickpeas, Chana dal, Green Mung Beans, Black Mapte, Masoor Dal, Red Lentils); Grains (Sorghum, Green Millet, Yellow Millet, Grey Millet, Yellow Maize) etc.

More than 300 Happy Clients worldwide:

Customers play a vital role in the success of any business. The company's aim is to excel at customer intimacy: striving to make every customer feel as they are the only one. From their global distribution network, they can continue to attract, maintain and surpass their customers' expectations of quality, innovation and service. No wonder, they are fast becoming a world leading supplier. They offer a range of food ingredients which have been independently approved and accredited enabling us to provide our clients with the highest quality products at the most competitive prices. They understand the importance of timely deliveries in your business operations. With efficient logistics and distribution network, you can count on AGS Foods India P. Ltd. to meet your deadlines consistently. Moreover, they understand that every business is unique. That's why they offer flexible solutions tailored to your specific requirements, whether it's packaging, quantities, or special requests.

Quality is priority:

Their close relationships with farmers and stringent quality control processes ensure that every batch of our products meets the highest standards. With us, one can be confident in the quality of every grain and spice one receive. The company's direct sourcing from farms and streamlined export processes allow them to offer competitive pricing without compromising on quality. This means you get exceptional value for your investment.

Glimpses of Indusfood and Indusfood Manufacturing 2025

INDUSFOOD™

Source. Process. Collaborate.

Trade Promotion Council of India successfully organised the mega 8th edition of Indusfood 2025 on January 8-10, 2025 at India Expo Mart, Greater Noida, with the support of the Department of Commerce, Government of India, Ministry of Agriculture and Farmer's Welfare and the Department for Animal Husbandry & Dairying. The event was inaugurated by the Union Minister of Food Processing Industries, Mr. Chirag Paswan at Expo Centre, Greater Noida. Noted Yog Guru Baba Ramdev was the guest of honour. They were joined on the dais by Mr. Mohit Singla, Chairman TPCI, Mr. Abhishek Dev, Chairman APEDA, Mr. Aashish Agrawal, MD, Bhikharam Chandmal and Mr. Aakash Shah, Director, Everest Food Products along with the distinguished guests, industry leaders and buyers from all over the world were present during the inauguration.

The event format of Indusfood 2025, with three concurrent trade fairs – Indusfood Food & Beverage, Indusfood Manufacturing and Indusfood Agri-Tech, was meticulously designed to foster seamless cross-domain synergies across the farm to fork value chain. In the 8th edition, Indusfood marked

INDUSFOOD™ MANUFACTURING

another pivotal milestone in its journey – to become an integrated farm to fork trade fair, capturing the entire value chain from farm to fork i.e. food production, processing and finally international market linkages. With this objective, launched two concurrent trade exhibitions – the 4th Edition of Indusfood Manufacturing and the inaugural edition of Indusfood AgriTech. This year, Indusfood also hosted the Asia Presidents Conference in partnership with the Indian Federation of Culinary Associations (IFCA). The 2025 edition witnessed participation from 35 leading international chefs and 100 Indian delegates, alongside professionals from Delhi NCR.

The Minister of State for Commerce and Industry, Mr. Jitin Prasada, inaugurated the 1st edition of Indusfood AgriTech and the 4th Edition of Indusfood Manufacturing at Yashobhoomi, Dwarka, New Delhi on 9th January 2025. Mr. Mohit Singla, Chairman TPCI, Dr. Rakesh Kumar, Chairman IEML, Mrs. Monika Gaur, Deputy Secretary, Ministry of Commerce and Industry, Mr. Vijay Kumar Gauba, Additional Director General, TPCI, along with the distinguished guests, industry leaders, and buyers from all over the world were present during the inauguration.

Cumin no possibility to increase

The sowing of new crop of cumin has already been over in the famous producing states like Rajasthan and Gujarat. Its sowing reported to be at the higher level from the last three years, but it reduced by 15 percent as compared to the previous year, despite this, here, the wholesale prices of cumin showed heavy downfall. Here, cumin prices held sluggish at Rs 25500 per quintal during the first week of January. After this, its prices declined by Rs 600 to Rs 24900 per quintal in the second week because of the weak buying from the stockists and new reports of sowing. In the third week, its prices dropped down by Rs 400 to Rs 25400 per quintal because of the sluggish trading activities. Apart from this, cumin prices reduced by Rs 900 to Rs 24500 per quintal during the last week. On the other hand, around 8000/10000 bags of cumin reported to arrive in Unjha and the prices declined by Rs 200 to Rs 4500/4700 per 20 kg as per the quality. The sowing of cumin usually starts after Dusshera in Gujarat and Rajasthan, but the temperature reported to be at the high by 35 degree in both the states, due to this reason, the sowing of new crop will likely to start after 15/20 days. Usually, the sowing of the crop has been start after the temperature sets at 30 degree celcius. According to the agricultural department, the crop has been sown in around 476500 hectares. It has been sown in 561300 hectares during the month of January. In this situation, the sowing of the crop descended by 15.10 percent to 84800 hectares in Gujarat. However, the nominal amount of sowing increased by 25 percent as compared to the last three years. The sowing of cumin seems rapid in Rajasthan. On the other hand, as per the data of Masala Board, 128505 tonnes of coriander worth Rs 3537.24 crore was exported from the country during the period of April to September of the year 2024/25. Whereas, almost 76970 tonnes of the stock reported to be export during the same period of the previous year which generated the income of Rs 2741.89 crore. The market may likely to remain in the limited area in February.

Turmeric: will remain sluggish

The trade of turmeric will likely to remain in the limited area during the last some time. In the first week of January, here, turmeric erode gatha asitis remained stable at Rs 14700 per quintal. In the second week, its prices rose by Rs 100 to Rs 14800 per quintal. Apart from this, its prices fell down by Rs 400 to Rs 14400 per quintal during the third week because of the weak demand at the higher level and in the last week, the prices of turmeric erode gatha asitis remained stable at Rs 14400 per quintal owing to the sluggish buying. In Erode, between 2000/7000 bags of turmeric reported to arrive on daily basis. There, turmeric prices have been ruling at Rs 14000/15500 per quintal as per the quality. Around 13000 lakh tonnes of turmeric has been produce in the country. Maharashtra, Telangana, Karnataka and Tamil Nadu are the famous producing states. Apart from this, nominal amount of turmeric has been produce in Andhra Pradesh, Orissa, West Bengal, Mizoram, Assam, Gujarat and Haryana. Erode is the biggest market of Turmeric and the domestic prices of turmeric have been fixed by the Erode market. Around 24000 to 29000 tonnes of turmeric reported to be import in the country. Both the traders and the stockists are waiting for the increment in the prices from the last 10 years. In the first five months of the year 2024-25, around 92911 tonnes of turmeric worth of Rs 1530.38 crore has been exported from the country. Before this, almost 92025 tonnes of the stock reported to be export which generated the income of Rs 918.94 during the same period of the previous year. On seeing this data, the export of turmeric improved by 1 percent and the income also increased by 67 percent. If the availability of turmeric will be high in the country, then India could have exploit the latest price of the international markets. The export of the spice may show uptrend during the near future which will be profitable for the domestic farmers. Apart from this, the stockists also may get profit from this increment. It is expected that the prices of turmeric will likely to remain sluggish during the next month.

Mahashian Di Hatti Pvt. Ltd.

MDH Spices has become a household name across the world

MDH Spices, the name which needs no introduction, are designed to cater to the varied needs of consumers all over the world. Several decades ago, housewives used to grind their spices manually at home and make their own blends for use in their cooking. To make this process simpler for the housewife, 'Mahashian Di Hatti' (MDH) visualised the concept of ready-to-use ground spices. MDH Pvt. Ltd. has set up five state of the art plants for meeting the ever growing demand. The company procures raw material directly from the centers of produce to maintain uniform taste and quality. The raw material is first cleaned, dried and tested with the help of special machines. It is then carefully grounded into the finished product by the use of fully automatic machines. The powdered spices are again tested at the fully equipped quality control laboratories, to ensure the best quality standards. They are then packed mechanically into packs of various proportions without any human touch. The MDH marketing and distribution team is always on the move to ensure timely delivery of its products to the consumers.

Late Mahashay Dharampal Ji, Founder of MDH, was always devoted to quality and purity of MDH spices. In fact the finest quality of MDH Spices has been recognised through various awards from time to time. Today, Mahashay Dharampal's son Mahashay Rajeev Gulati is adding more happy customers to its ever rising consumer base as Chairman of MDH. His major achievement lies in putting MDH on world map. Under his leadership, MDH Spices have become a symbol of good taste, flavour and fine cooking. MDH spices and blends are popular not just in India but also around the world and the products are being exported to the USA, Canada, United Kingdom, Europe, South East Asia, Japan, U.A.E. and Saudi Arabia. The company has its own office in London (UK) and a state of art manufacturing unit at Sharjah (UAE).

Rich range of products:

MDH, a century-old brand, today has a range of 62 products available in over 150 different packages. MDH takes special care in selecting the raw material for the ground single spices category. This provides the consumer with spices made from the choicest raw material maintaining the highest processing standards. MDH Ground spices include: Black Pepper, Deggi Mirch, Dhania Powder, Haldi Powder, Jeera Powder, Kashmiri Mirch Powder, Kasoori Methi etc. Moreover, MDH blended spices are a class apart. Each blend has been specially formulated to impart the genuine taste to various Indian food preparations. Decades of research has gone into preparing these blends needed in specific and classical Indian dishes. MDH Blended spices include: Amchoor Powder, Biryani Masala, Butter Chicken, Chana Masala, Curry Powder, Dahivada Raita Masala, Fish Masala, Garam Masala, Panipuri Masala, Pav Bhaji Masala, Sambhar Masala, T-Plus Masala etc. MDH sells even exotic spices like saffron.

Chairman's Message:

Since times immemorial, spices have been an essential ingredient, especially in Indian cuisine. Spices have travelled through the ancient times, to medieval as a means of not only a business, but as a companion of good health. From single ground spices to blended spices, experimentation has been the core idea to bring the best taste to the table. To enhance the taste, compromising on the essentials of spices like essence and oils is easy, but contrary to use of spices at all. It is as good as serving milk without calcium and proteins.

MDH is that pioneer in the spices industry which developed the taste of Indian blends in the country and around the world. Taste and flavour have become synonymous to MDH spices. The ideology of retaining the flavours along with maintaining natural properties of spices, what makes MDH to stand apart. With the world-class equipment, trained team and dedicated researchers to enhance our products, MDH is a brand more than 100 years old. We are geared up to meet the ever-growing demand nationally and internationally. Always devoted to quality and purity, MDH stands committed to the progressive policies of producing & providing best products and hope to receive the same love and trust of its customers in the future too.

Mahashay Rajeev Gulati Ji
Chairman - MDH

Russia's flour exports increase in 2024

Russia's wheat flour exports rose both in terms of volume and value in 2024 as shipments to Afghanistan doubled over the previous year, Reuters reported. A report by the agency showed that Russia's flour exports increased by 7% while also increasing by 3% in value terms, according to Reuters, with about \$300 million worth being exported last year. Afghanistan, perennially the world's leading flour importer, imported nearly \$80 million of Russian flour, double the 2023 level, according to the report. Russia has been strengthening ties with the war-torn country since the United States military pulled out of Afghanistan in 2020. China, which also has become more politically tied to Russia in recent years, was the second largest importer of Russian flour in 2024, the report said. Russia exported a record 1.15 million tonnes of wheat flour (wheat equivalent) in 2023-24, an all-time high, according to the International Grains Council. The IGC's most recent projections for 2024-25 peg Russian flour shipments at 950,000 tonnes, down 17% but still a historically high total.

Maize production hits all-time high of 4.87m tonnes in Bangladesh

Maize production in the country reached an all-time high in the last fiscal year (FY 2023-24) thanks to rocketing demand for it from the feed and food-processing industries. The output registered a record 4.87 million tonnes from 0.513 million hectares of land, both winter and summer crops combined, according to latest data from the Bangladesh Bureau of Statistics (BBS), the official statistics provider. The production grew by an impressive 7.0 percent over FY '23 when farmers harvested more than 4.55 million tonnes. The agriculture ministry had a target to harvest 5.81 million tonnes from 0.543 million hectares. Director General of the Bangladesh Wheat and Maize Research Institute Dr Salahuddin Ahmed said the climate in Bangladesh is suitable for maize farming and farmers are switching gradually from other crops to cultivate it. "We expect the newly developed seeds to increase production to 6.0 million tonnes," he said, adding that farmers are getting more interested in farming maize due to high prices of the crop amid surging demand from the feed industry. The Bangladesh Feed Producers Association said the industry needs 6.5 million tons of maize a year and they import about 1-2 million tons a year to cover the local shortfall.

Adani Wilmar starts Rs 1,300-cr food processing plant in Haryana's Sonapat

Edible oil firm Adani Wilmar Ltd has commenced operation of its food processing plant at Sonapat, Haryana, which it has established with an investment of nearly Rs 1,300 crore. Recently, Adani Wilmar said the company has commenced operations at its integrated food processing plant in Gohana, District Sonapat. "This food complex is one of the largest in the country built with a capital outlay of Rs 1,298 crore coming from IPO proceeds," the

company said. The plant will help generate 2,000 direct and indirect employment in Haryana. The facility spread across 85 acres, has a total annual production capacity of 6.27 lakh tonnes. The plant will manufacture 4,50,000 tonnes of food products including rice, wheat flour, suji, rawa, and maida, along with 2 lakh tonnes of edible oils such as mustard oil, rice bran oil, and cottonseed oil, apart from Mustard DOC and Ricebran DOC for animal feed.

Provides Complete Food and Beverage Solutions

Brief Introduction

We at Puran Chand and Sons Group of Companies are experts in providing Food and Beverage solutions since 1921, our 100+ years of FMCG experience has enabled us to offer specialized offerings for our retail and B2B clients.

ZONE, our beverage solutions brand has been a pioneer since its inception in 1999 and has been the market leader since then. The brand currently offers over 50 beverage solutions across categories like Non-Alcoholic Syrups, Fruit crushes, beverage mixes, cordials etc. We've helped more than 17,000 cafes, banquets, caterers and other B2B clientele reduce their food ingredients costs by 37%.

SOLAR our B2C brand offers 50+ SKUs across categories like herbs, seasonings, baking essentials, etc to over 12,300 retailers across 10 states. We've helped these retailers increase their revenue by almost 27%.

Our two manufacturing units of 30,000sq ft and an upcoming state-of-the-art 50,000 sq ft facility house over 100 team members who follow stringent quality checks and over 17+ checklists which ensure that goods reach you in the desired and safest conditions. Thus we're able to offer over 120+ SKU's to over 18,000 customers directly and to over 87000 customers indirectly across our 2 brands ZONE & SOLAR.

Some of our Esteemed clients include Radisson, Park Hotels, Moti Mahal, The President's House, Impressario Restaurants, Olive Group of Restaurants, For Earth's Sake Sustainable Cafe, The Burger Club, Burger Pub, Shangri La, Xero Degrees, Chai Theka, MBA Chaiwala and many more.

History

Puran Chand Sons was established in 1921 as a trader in food commodities and after almost 6 decades, in the year 1984, Solar Sales (India) was incorporated under the mentorship of Late Shri Surender Jain to bring the best of global foods to India.

Mr. Vineet Jain
Managing Director

- | | |
|---------------------------|-----------------------------|
| - Non Alcoholic Syrups | - Baking Essentials |
| - Fruit Crushes | - Herbs & Seasonings |
| - Cordials | - Gourmet Sugars |
| - Lemon Juice & Seasoning | - Custard & Cornflour |
| - Ethnic Syrups | - Instant Soup Powders |
| - Dessert Topping Sauces | - Preservatives & Additives |
| - Culinary Sauces | - Milkshake Mixes |

Thereafter "Solar" was trademarked as the company's first food ingredient brand that offered quality and unique products from across the globe. In 1987, Solar Sales (India) became the second company in India to manufacture mineral water in PVC bottles. In 1990, we became a vendor for canned foods to India's scientific expedition to Antarctica via Kendriya Bhandar and in 1991 we became the first company to make Instant Suji Halwa for our armed forces in forwarding areas. In 1992, our company got canned baby corn to the Indian subcontinent and introduced the Indian markets to products like Worcestershire, 8n8 (date sauce), and barbeque sauce.

In the year 1994, Solar Sales (India) brought homemade pulao in a ready to eat pack for the first time in the Indian food industry. It was in the year 2000, when the company's Managing Director, Mr. Vineet Jain, saw a huge market potential for flavoured syrups and launched 8 variants under the brand

"ZONE". In 2003, the company's brand becomes a roaring success in the market and the flavor portfolio grew from 8 to 25. In 2005, the company's management realized the need for all-year-round fruit demand in beverages and thus launched Fruit Crushes under the brand name "ZONE". Between 2005-2012, new flavors were added under the brand "ZONE" which took the total count of flavors to 40. The current managing directors, Mr. Shubham Jain and Mr. Udit Jain are taking the group to new heights with their skills and sheer hard work. Today, the company has one of the highest variants of the product line any Indian company has to offer.

Current Scenario

When asked about future developments, partnerships, products launches, processes and systems that enable Puran Chand & Sons Group of companies to provide the best of services to their clients, Mr. Jain concluded that the group is present in 19 states with their 120+ SKU offering and are serving over 87000 customers directly and indirectly through their distribution channels and E-commerce partners. The group is also about to launch over 15+ new products that will help increase their product portfolio and ease up HORECA's partner's operations.

For systems and processes, the group now relies on data, systems, and efficiently managed processes with over 17+ checklists and stringent quality checks that enable them to provide the safest and tastiest products right to the customers. What started out as an unorganized business has now been transformed into a system-driven professional company.

Concluding Note from the MD, Mr. Vineet Jain

We're excited about our future plans and can't wait to show everyone what we have in store, right from new products, and processes to never before seen packaging, categories, and equipment. All we can say is, watch out for the group and its offerings.

Mustard oil

downfall, but no decrement in the future

The prices of mustard oil reduced by Rs 450 to Rs 12750 per quintal due to the constant selling from the stockists in the January month and weak demand. In tins, its prices slipped by Rs 50 to Rs 2200/2400 per quintal. In Dadri mandi, it is being quoted at Rs 12700 per quintal. There were around 2 lakh bags of mustard reported to arrive regularly in the various markets of the country. The prices of mustard 42 percent conditioned also descended by Rs 250 to Rs 6100/6125 per quintal because of the feeble selling in the markets of Rajasthan. In Bharatpur and Alwar, it is being traded at Rs 5750/5800 per quintal. In Jaipur, mustard kachi ghani prices also declined by Rs 400 to Rs 12800 per quintal because of the weak demand from Bihar and Bengal. There were around 121 lakh tonnes of mustard reported to arrive in the markets of the country during the current production season. Later on, the production declined to 115 lakh tonnes. In 2024/25 the mustard reported to be sown in around 88.50 lakh hectares in the country till mid of the January, but in 2023/24, it was sown in around 93.30 lakh hectares during the same period of the previous year. This year, the production of mustard reported to be high because of the favourable weather conditions. The government has been attempting every possible thing to control the inflation in the prices of edible oils. The new crop of mustard reported to arrive during the next month, in these circumstances, there is no possibility of more uptrend in the prices of mustard till the arrival of the new crop. It is expected that the market may likely to move in the limited area during the coming days.

Rice bran oil likely to remain stable

The prices of rice bran oil reduced by Rs 400 per quintal during the month of December due to the shortage of demand. There is no possibility of more downtrend in the prices during the near future. The prices of imported oils seems sluggish and its prices descended by Rs 400 to Rs 10000 per quintal during the last one month due to the weak demand from the refined blenders at the higher prices and downfall in the prices of imported oils. In contrary to this, refined prices also remained stable at Rs 12200 per quintal because of the weak offtake. The government has reduced the tariff rates in the prices of edible oils, due to this reason, the prices of imported soya refined and sunflower RBD palm oil showed constant decrement. The prices of edible oils showed downfall due to this reason, the demand of the stock remains constant. The paddy has been majorly produce in UP, Punjab, Uttarakhand and Bengal. There were around 10 lakh tonnes of rice bran oil reported to be produce in the country during the current season. Huge amount of rice bran oil Punjab has been exported to Vietnam and Bangladesh. The demand of edible oils may show uptrend during the near future on seeing the consumption season. The prices of rice bran oil may not show more downfall due to the stock and demand.

Urad

downfall due to the selling of the stock in Burma

The traders of urad are selling the stock at the lower level in Burma during the previous week, due to which, both the desi and the imported stock showed heavy downfall in the domestic markets along with Delhi. During the review week, the stock of urad SQ which was being sold at Rs 91 per kg, but now, it is ruling at Rs 81 per kg as the spot and the forward deals of Chennai has been done at Rs 1011 per quintal. Urad FAQ slipped from Rs 83 to Rs 75 per kg during the review period. On the other hand, the urad SQ which was being traded at \$980 in Burma, but now, its prices declined to \$855 per tonne. Similarly, urad FAQ also reduced from \$890 to \$755 per tonne. There is no possibility of long uptrend in the prices on seeing the selling pressure of the stock, but the prices may not show more downfall during the month of February. It is expected that the market may improve by Rs 1/1.5 per kg because both the traders and the big mills have done the deals at the lower level due to the constant downfall in the market whose delivery has been remaining, due to this, the prices may not show more downfall during the coming days.

Victoria Foods Pvt. Ltd.

**offers widest range of products carefully
curated to meet to meet your health & taste needs**

Victoria Foods Pvt. Ltd. is one of the most reputed manufacturing group of companies engaged in manufacturing, packing and marketing of wide range of Grocery items under the brand name "Rajdhani". They are accredited with ISO 22000-2005, FSSC 22000 & SEDEX SMETA. The company also has necessary approvals and certifications from Government of India organizations like Food Safety & Standards Authority of India (FSSAI), AGMARK, APEDA. They are backed by a sound infrastructure with installed manufacturing capabilities to the tune of 2200 tons/day from 8 units located in Northern & Central India. The company has a strong distribution network across North India catering to about half a million sales points directly and indirectly. They distribute our products all the way from the remote corners of Dimapur to the extreme areas of Ladakh. Their 500+ distributors network is supported a highly motivated sales team on ground. Other than 'Rajdhani', the company has other brands also namely 'Fiesta', 'All Seasons' and 'SELECT'.

They are strong partners with the modern format retailers like Reliance, Metro Cash & Carry, Wal-Mart, More Retail and many more. They work aggressively with the online platforms like Flipkart, Grofers, Amazon, Zomato, Udaan etc. They are a preferred partner for HORECA and new age kitchens. They also work closely with the Government backed stores like the Nafed, HarHith, Police canteens, Navy, Mother Dairy, Kendriya Bhandar.

They are also a strong

supplier for the Namkeen and Halwai industry from the small home kitchen set up to the big names like Pratap Snacks, Bikaji, Bikano and Haldirams. The company has been exporting their products directly since 2000. In all these years, they have reached to markets like USA, UK, France, Germany, UAE, Kuwait, Saudi Arabia, South Africa, almost all the countries in the South East Asia, Australia and New Zealand. Now the focus in going deep into each market and start behaving like a local brand to help grow our customer base. They are

also a leading importer of grains from Australia, Ethiopia, Canada, Myanmar, China into India. They handle about 50,000 tons of grain import each year.

Red chilli will remain sluggish

The arrival pressure of red chilli reported to be high in the markets of Andhra Pradesh and Telangana, due to this reason, the wholesale prices of spice commodities showed heavy downfall. Here, the prices of red chilli 334 no. remained stable at Rs 17000 per quintal during the first two weeks of January. In the third week, its prices declined by Rs 4000 to Rs 13000 per quintal because of the increased selling from the stockists, after this, red chilli 334 no. remained stable at the same level. The arrival pressure of red chilli reported to be at the higher level in Telangana and Andhra Pradesh because of the decrement in the prices of red chilli. There were around 1.25 lakh bags of red chilli reported to arrive in the Guntur mandi of Andhra Pradesh. There, the arrival pressure of the new stock may not likely to increase before February. Presently, the weather reported to be clear in the Guntur area, due to this reason, the arrival pressure may show uptrend. However, there is a shortage of around 25/30 percent of red chilli in the famous producing areas, but the productivity of the stock may increase after the good availability on seeing the favourable weather conditions. Huge amount of remaining stock has been lying in markets. There were around 15 lakh bags of red chilli reported to be lying in Guntur as per the traders. Same amount of stock has also been lying in the other market. The arrival pressure of new crop may increase after the fortnight, due to this reason, the remaining stock expected to be sold out in the markets. It is expected that around 15 lakh bags will likely to be remain till February 2025. In the first half of the financial year 2024/25, a total of 271948 tonnes of red chilli worth Rs 4575.82 crore was exported from the country. Before this, around 260219 tonnes of the stock reported to be export during the same period of the previous year which generated the income of Rs 5390.07 crore. According to this data, the export of red chilli improved by 5 percent, but the income declined by Rs 15 percent. In these circumstances, the prices of red chilli will likely to remain sluggish in the month of March.

Coriander will likely to remain strong

The sowing of coriander has already been over in all the producing areas like MP, Rajasthan and Gujarat. This year, its sowing dropped down by 20/25 percent in the MP and Rajasthan, due to this reason, the wholesale price of coriander will likely to remain sluggish in the markets. Here, coriander badami prices held stable at Rs 9100 per quintal in the first week of January. After this, its prices descended by Rs 200 to Rs 8900 per quintal during the second week because of the weak buying from the stockists. After this, its prices held stable at the same level till the end of this month. Its sowing has already been over in all the famous producing states of the country. The sowing of coriander ascended by 3 percent in the Gujarat as compared to the previous season. According to the agriculture department, the coriander has been sown in around 130700 hectares till 20th January. It had been sown in around 1.27 lakh hectares during the same period of the previous year. This year, the sowing of coriander increased by 3700 hectares or 2.91 percent in Gujarat as compared to the previous season. In other words, its sowing has been done as similar to the last season. There were around 4500 bags of coriander reported to arrive in the Ramganj mandi. Apart from this, around 500/900 bags of coriander reported to arrive in baran mandi. On seeing this situation of arrivals, the prices of coriander badami and eagle have been ruling at Rs 6500/6800 and Rs 6900/7200 per quintal respectively. The weather does not seems favourable for the sowing of new crop of coriander, due to this reason, the sowing of the crop was delayed around 15/20 days not only in Gujarat but also in Rajasthan and MP, after this, the farmers have been sowing the crop rapidly. On the other hand, according to the data of the spice board, 29661 tonnes of coriander worth Rs 309.40 crore was exported from the country. Before this, around 71931 tonnes of coriander reported to be export during the same period of the previous year and it generated the income of Rs 592.27 crore. The market of coriander will likely to remain sluggish during the month of January.

National Turmeric Board established at Nizamabad

Union Minister of Commerce & Industry, Shri Piyush on 14th January 2025 inaugurated the National Turmeric Board in New Delhi. Shri Goyal announced Shri Palle Ganga Reddy as its first Chairperson. The headquarters of the Board has been set up at Nizamabad. The Minister noted that the launch of the National Turmeric Board is on an auspicious day of celebrations across the country. He highlighted that representatives from various ministries will also be a part of the National Turmeric Board. Representatives from exporters and producers bodies will also be added to the Board. Adding that turmeric is also known as 'Golden Spice', he pointed out that the newly formed Board will pay special attention to the welfare of the turmeric farmers spread across 20 states, including Maharashtra, Tamil Nadu, Andhra Pradesh, Telangana, Madhya Pradesh, Meghalaya and others. He said that there is immense potential in increasing turmeric production in Andhra Pradesh and Telangana and formation of the Turmeric Board will boost income of turmeric producers in the country.

The Minister noted that the new Board will promote research and development of new turmeric products, and will look into the value addition of turmeric related products for marketing abroad. The Board will also look into creating awareness on the essential and medical properties of turmeric, ways to increase its yield and boost logistics and supply chain to foster trade into newer markets, he said. Shri Goyal also highlighted that the Board will also ensure quality and safety standards of turmeric production and exports. Shri Goyal said that last year, 2023-24, an area of 3.05 lakh hectare was under turmeric cultivation in India with a production of 10.74 lakh tonnes. India was responsible for over 70% of global turmeric production, he informed. He also shared that there are 30 varieties of turmeric produced in India. Union Minister of State for Home Affairs Shri Bandi Sanjay Kumar, and Shri Arvind Dharmapuri, Member of Parliament, Nizamabad also graced the event.

In addition to the Chairperson of the Board, representatives of Ministry of AYUSH, Department of Pharmaceuticals, Department of Agriculture & Farmers Welfare and Department of Commerce

have also been nominated. Representatives from the top two turmeric growing states of Maharashtra and Telangana and from the state of Meghalaya, which is famous for its Lakadong Turmeric, will also be part of the Board. States will be represented on the Board by rotation. The National Turmeric Board will focus on the overall development and growth of the turmeric sector in the country. The National Turmeric Board will provide leadership, augment efforts and facilitate coordination with other Government Departments/Agencies in matters pertaining to the turmeric sector and facilitate growth and development of the Turmeric sector in the country. It will help bring focus to efforts of tapping the vast potential that exists for increasing trade of turmeric and its products, especially in view of the health and wellness benefits of turmeric. India is the largest producer, consumer and exporter of turmeric in the world. India has more than 62% share of world trade. During 2023-24, 1.62 lakh tonnes of turmeric and turmeric products valued at 226.5 million USD was exported.

BIKANERVALA GROUP

SINCE 1905

Serving deliciousness since 1905 across the world!

Bikanervala Group is a well-celebrated name in the Indian food industry. It is one of the most loved brand when it comes to Indian sweets, snacks, food and savouries. The group owns and operates two brands, Bikanervala and Bikano which offer a wide range of traditional and modern sweets, snacks, food and savouries. The Bikanervala Group is known for its commitment to quality. All of its products are made with the finest ingredients and traditional recipes, ensuring that customers get an authentic taste of pan-Indian cuisine. Furthermore, the group has been at the forefront of introducing new products and flavors, keeping the treasure of traditions alive in the newness. Gradually our name became synonymous with quality and our reputation traveled far beyond the city walls. Over the generations Bikanervala not only become a popular brand in India, but also established itself as an ambassador of Indian flavors in global arena.

Our commitment to excellence has been recognized and rewarded with numerous awards from various authorities & organizations. We are proud to have earned recognition for our outstanding quality, business operations, and leadership in the food industry. We remain dedicated to providing the best products and services to our customers and are honored to have been appreciated for our efforts.

Bikanervala Concept - Trusted brand for its quality, hygiene and taste

Bikanervala is not just another food brand, but an amalgamation of the traditional taste, generation old recipes and quality ingredients, that gives our sweets, snacks and food items an unmatched taste of Indian culture. Bikanervala produced sweets are "for every sweet occasion", be it your go to dessert, or a nutritious munching bite, or for spreading the sweetness as gifts & hampers. Our sweets ranges from Bengali Rasmalai, Rasgullas to Kaju Katli, Motichoor Laddu, to rich in taste Gulab Jamun and many more. The menu is designed keeping versatility of taste buds in mind. Different times of the day cater to different needs and segments. Classics like Chola Bhatura, Pao Bhaji, Indian Street food, tempting Chaats and Pani-Puri are all time favorites. The practice of central-level production is exercised. From the central kitchen the production is then sent to outlets. This centralized control on production helps in maintaining the recipes with a consistent quality and taste.

The outlet size ranges from 600 sq. ft. to 20,000 sq. ft. The customer footfall goes around 500-2000 customers per day depending upon factors like outlet size, location, visibility etc. The outlets are designed having standardized system of communication panels, product display shelves, counter display and seating. Our emphasis is to make the customer visits

Managing Director's Message:

At Bikanervala, we think differently. We think in terms of learning from the traditions and marching into the future with products that retain traditional values and yet cater to the generation next. Traditional Indian sweets and snacks were developed as the expressions of regional hospitality. Our forefathers sourced the finest ingredients from far and wide and mastered recipes that eventually became part of our culture. We at Bikanervala have been a custodian of this treasure for over a century. When a part of our family moved from Bikaner in Rajasthan to Delhi and introduced some of these delights to the discerning customers of Delhi, the capital of India, a new brand was born — Bikanervala.

Slowly our name became synonymous with quality and our reputation traveled far beyond the city walls. Over the generations Bikanervala not only become a popular brand in India, but also established itself as an ambassador of Indian flavors in global arena. For me personally it has been like a mission to take the taste of India around the world as packaged Bikano products and the ambiance of Bikanervala outlets with their aroma of pan-Indian cuisine, sweets and snacks.

Mr. Shyam Sunder Aggarwal
Managing Director
Bikanervala Foods Pvt. Ltd.

comfortable that gives them a memorable experience. We have matured into a modern brand. We have balanced the contemporary lifestyle and requirements of the younger generation while maintaining the values and classic traditions of the good old times. The elements of traditional Indian culture and cuisine with modern technology of manufacturing and packaging are combined harmoniously. The brand being a century old has become a popular household name which has travelled beyond the geographical boundary of India. Key strengths that have made it possible are the core values, integrity towards offering consistent taste & quality, product uniqueness, and celebrated brand value.

Products & Services:

Our products are a celebration of life, a comforting reminder of our traditions that have been passed down for generations. A bite of Bikanervala Sweets takes you to a place of warmth, joy and happiness. The spices of Indian cuisine bring you back to your roots. The aromas of the products evoke memories of family gatherings and special occasions. The flavours of Bikanervala products are a reminder of the love and devotion put into each dish, the essence of the old Indian tradition. The smell of the Indian food, chaats and snacks brings a wave of nostalgia and fills your heart with joy. It reminds you of the love and care your families put into every meal. Savoring the flavors of Indian dishes is like a warm hug from home and is a way for us to connect with our culture and heritage.

Keeping Our Heritage Alive and Brand Values Intact:

Irrespective of the diversification strategies incorporated in production and output, our core value is keeping the traditional taste of the heritage and culture from where we hail completely intact. Our Sweets, snacks, savories and food items all are rich in the traditional taste of Indian land, and are prepared from recipes that our forefathers bestowed us with generations ago.

Transparency-We believe in being transparent with our consumers at all stages of manufacturing and producing snacks. We also always remain transparent with our employees at every level of work.

Commitment for Quality - We are committed to provide high

quality in all our endeavours, services and goods. Without quality we would not feel the motivation to remain in the business.

Passion for Work - Our work traces back to years. Since inception to present date, we have survived a lot of challenges owing to our passion to produce best and be the best manufacturer of snacks and sweets.

Integrity & Honesty - Bikanervala has touched the hearts of millions because it carries integrity & honesty in its values and work. We carry out our duties with utmost integrity & honesty.

Customer Satisfaction - Whether it is any outlet, service or any product, we are highly driven by customer's satisfaction. We value this aspect above everything as for us the customer is the king.

Innovation and Technology - Keeping the hygienic factors and better quality products as our primary concerns, we incorporate innovation and latest technology so that our products & services reflect the hard work we put at every step.

Bikano: Unique and Pure vegetarian concept

In 1990, we diversified into the business of packaged food with the brand 'Bikano' and pioneered the art of blending the traditional taste in a modern form through the state-of-the-art facilities located in New Delhi, Greater Noida, Yamuna Expressway, Rai (Sonipat) & Hyderabad. Today, we have a wide range of Namkeen, Snacks, Sweets, Papad, Frozen Range and Syrups etc. All these are manufactured in fully automated plants. We serve true authentic recipes to the consumer in the form of packaged food. Taste, hygiene and quality is our connecting factor with our consumers. We strive to provide value for money products to our customers and have expanded our footprints not only in the country but also established our name across the globe.

Our vast distribution network of more than 3,000 channel partners and huge retailer base have ensured reach of Bikano products to every nook and corner of the nation. Apart from that, we have also marked our presence on international map by exporting to more than 45 countries among which major ones are USA, Europe, Asia, Canada, Australia, New Zealand, Singapore, etc

Govt extends free tur dal imports till March 2026

The government has extended the free import for tur dal till March 31 next year. The Directorate General of Foreign Trade (DGFT) issued a notification in this regard. "The free import policy of tur stands extended up to March 31, 2026," it said. Products under the free category have no curbs on their imports. The existing import policy was first introduced in May 2021 and extended several times till March 2025 amid faltering domestic production due to El Niño weather pattern. Government stocks also got exhausted for ensuring food security during the pandemic. The Centre is deploying the strategy of boosting supply in a bid to control food inflation as retail prices of pulses are still high despite recent declines. Data from the Ministry of Consumer Affairs shows year-on-year retail prices of tur are nearly 10% lower in Delhi, Maharashtra, Karnataka, and Kerala, and higher by about 10-20% in Rajasthan, West Bengal, Sikkim, Chandigarh etc. The All India average retail price of tur dal at Rs 152/kg on January 20 is higher by 1% compared to a year earlier.

The domestic trade and industry was also hoping for the Centre to continue the current import policy for tur. "We were expecting the duty free imports to continue as the government estimate of tur production is similar to the previous year," said Bimal Kothari, president, All India Pulses and Grains Association (IPGA). India's tur production stood at 3.4 million tonnes last year, which is projected to rise marginally to 3.5 million tonnes this year. This marks a decline from 4.3 million tonnes tur output in FY21 and 4.2 million tonnes in FY22. According to trade estimates, India is expected to have imported more than 1 million tonnes of tur in the first three quarters of this fiscal year. During FY22 till FY24, India imported around 800,000 tonnes tur, according to trade estimates.

South Korean rice crop suffers yield drop

The South Korean government has revised its marketing year 2024-25 milled rice production estimate down to 3.58 million tonnes, reflecting a 2% yield reduction due to extreme heat, untimely rains and pest damage, according to a report from the Foreign Agricultural Service (FAS) of the US Department of Agriculture. In its Jan. 29 Global Agricultural Information Network report, the FAS said Statistics Korea (KOSTAT) released its final production estimate on Nov. 15 based on field surveys that showed unexpected yield losses from harvested area that was unchanged at 698,000 hectares. "Damage from widespread brown planthopper infestations deteriorated further after KOSTAT's last crop survey was completed in late September," the FAS said. "Heavy rainfall and high temperatures from September to October exposed rice to more extreme pest infestation than usual."

Amid political pressure from farm groups to counteract declining farmgate rice prices, the government announced its long-term rice reformation plan measures in December to address the nation's chronic oversupply of rice. The plan includes acreage reduction, improving rice quality, developing new demand, strengthening local distribution competition, and supporting research and development for high-quality rice and new demand. The FAS revised its forecast for 2024-25 rice consumption up to 4.11 million tonnes, up 160,000 tonnes, or 3.9%, from its previous report due to the government's policies to encourage greater use of rice in food and beverage processing and feed. However, these policies are not expected to reverse the steady decline in household table rice consumption, the FAS said. "The continuous decline in rice consumption, especially among young adults, is exemplified by the growing preference for alternative breakfast meals (bread and sandwiches), and the rising rate of skipping breakfast," the FAS said. "A consumer behaviour survey published by the Korea Rural Economic Institute (KREI) in January 2025 showed that 66.7% of Korean consumers preferred rice for breakfast in 2024, down from 83.5% in 2017."

MR. GURDIP SINGH
Managing Director

DOUBLE ELEPHANT BRAND

MRS. PUJA BAGGA
Director

B. NATHA SINGH KARAM SINGH PVT. LTD.

dynamic Entrepreneurs in the field of Rice Milling & Exports

We B.Natha Singh Karam Singh (Pvt.) Ltd are the dynamic Entrepreneur and among the pioneers in the field of Rice Milling & Export of Rice under the brand name of Double Elephant Basmati Rice. It was in the year 1895, When we installed our first Rice Mill in Kamoki (Karachi now in Pakistan). For us Rice Milling has been a family business to which we are sincerely dedicated which is evident from the fact that now it has passed on to the FOURTH generation who are sincerely dedicated with the zeal to give the Best Quality of Basmati Rice. We participated for the 1st time in 1979 in *Gulfood* Dubai.

Double Elephant the oldest registered brand name in India for rice, to reckon with the world over, since 1932, the year of its launch. To serve you even better we have come up with a new ultra modern processing and milling plant at G.T. Karnal Road,

Bakoli, Delhi (India) in 1978 & Tarn Taran Road, Amritsar, Punjab (India).

RESEARCH & DEVELOPMENT

Our well qualified team of quality conscious experts take utmost care at each stage of Processing and production which includes Husking, Grading, Polishing and Separation, Sorting etc. of rice. To prove our dedication we have our own R&D which is a continuous process for taking care of both Manufacturing process and in the field of Marketing techniques update.

PACKAGING & MARKETING

We also realise that a very important part of marketing is packaging so they are attractively packed in Non-woven, Pouches, Jars & Jute Bags and in consumer packs of upto ½ Kgs. Which are further packed in durable cartoons for sound and safe delivery during transit to various destination.

Cashew not likely to increase

Here, the prices of cashew 320 no. showed downfall in the November month. During the review week, the prices declined by Rs 30 per kg due to the weak buying from the stockists and higher prices than the normal level. Here, cashew 320no. remained stable at Rs 910 per kg in the review month. Its prices gained by Rs 30 to Rs 930 per kg because of the increased buying from the stockists during the second week. In the third week, cashew 320 no. dropped down in the same ratio to Rs 900 per kg. Similarly, its prices remained stable at the same level during the last week of January. The domestic prices of cashew showed downfall because of the higher prices than the normal level and weak support of sale. On the other hand, there is no consumption season, but the new production season will likely to start soon in the country. The production of new cashew will likely to start soon in the famous producing countries along with India. This season has been started from January in Africa and Vietnam and probably to be ends in June. In Brazil, its production reported to be starts in September and ends in February. Apart from this, its production season in eastern Africa has been starts in September and ends in December. In this situation, the availability of cashew showed uptrend, whereas, its consumption seems weak. Around 7.25 lakh tonnes of raw cashew reported to be produce in India. However, India is one of the major export country and it exported

almost 98516 tonnes of the stock which generated the income of Rs 4700 crore. On the other hand, cashew is the famous importer of raw cashew. The prices of cashew have been fixed on seeing the import of the raw cashew. There is no possibility of more uptrend in the prices during the coming days.

Almond Kernel will remain strong

Here, the prices of almond kernel California showed downfall during the month of January. In the first week of the previous year, here, the prices of almond kernel California remained stable at Rs 855 per kg and its prices fell down by Rs 25 to Rs 830 per kg after Diwali and weak consumption. After this, the prices of cumin showed downfall and in the third week, its prices reduced by Rs 30 to Rs 800 per kg. During the last week, the prices of almond kernel California remained stable at the same level. Before this, the prices of almond and its kernel seems high because of the fire in the biggest famous producing state California, after this, the state faced tornado, due to this reason, the crop reported to be spoil in California. After this, the first gets under control, but again it reported to be increase, due to this, the market sentiments may change. On the other hand, the American dollar reached its higher level as compared to the other famous currencies from the last two days which means, the rupee showed record downfall against the American dollar. The import of almond and its kernel along with other agricultural products seems high, due to this reason, the market sentiments may change. Here, the seasonal demand of winter has already been fulfilled. However, the wedding season has been started, but the market sentiments may not get support because of the limited weddings. There is no possibility of long uptrend in the prices of cumin during the coming days.

India's fruit and vegetable exports surge 47.3 pc with APEDA's financial assistance: Commerce Ministry

India's exports of fruits and vegetables have witnessed a significant surge of 47.3 percent in volume between the financial years 2019-20 and 2023-24, according to the Ministry of Commerce & Industry. This remarkable growth has been attributed to the financial assistance schemes provided by the Agricultural and Processed Food Products Export Development Authority (APEDA) under the Department of Commerce. The ministry in an official statement said "APEDA's financial assistance schemes boosts 47.3 pc surge in India's fruit and vegetable exports". APEDA has been supporting exporters through various initiatives under the Agriculture and Processed Foods Export Promotion Scheme. It provides financial aid for setting up essential export facilities such as packhouses with grading and packing lines, pre-cooling units, cold storage, refrigerated transportation, and treatment facilities like irradiation, vapor heat treatment, and hot water dip treatment. This infrastructure helps ensure that exported fruits and vegetables meet international quality standards. To enhance product quality, financial support is given for purchasing laboratory testing equipment, installing quality management systems, and using handheld devices to track farm-level data. This

also includes testing for water, soil, and pesticide residues to meet the stringent requirements of importing countries.

The ministry also noted that APEDA assists exporters in expanding their reach by participating in international trade fairs, organizing buyer-seller meets, and developing better packaging standards. These efforts help boost the global competitiveness of Indian agricultural produce. In the financial year 2023-24, India's fresh fruits and vegetables were exported to 123 countries. Over the last three years, Indian produce has entered 17 new markets, including Brazil, Georgia, Uganda, Papua New Guinea, the Czech Republic, and Ghana. To further enhance market access, the Ministry of Agriculture & Farmers Welfare (MoA&FW) and APEDA have identified key products and target countries for focused trade negotiations. The ministry also stated that special efforts are being made to develop sea transport protocols for horticultural products. It said "Development of Sea protocols for horticulture products to reduce logistic expenses and to enable larger volume of exports". Regular discussions are also being held with authorities in importing countries, supported by Indian diplomatic missions abroad. With these ongoing initiatives, APEDA continues to play an important role in strengthening India's agricultural exports.

India ranks 7th in global coffee production as exports hit \$1.29 billion

India has emerged as the world's seventh-largest coffee producer, with exports reaching \$1.29 billion in FY 2023-24, almost double the \$719.42 million recorded in 2020-21, according to a press release from the Commerce Ministry. India's coffee exports have grown significantly due to the increasing global demand for its rich and unique flavors. In the first half of January 2025 India exported over 9,300 tonnes of coffee with top buyers including Italy, Belgium, and Russia. Approximately three-fourths of India's coffee production consists of Arabica and Robusta beans. These are primarily exported as unroasted beans. However, there is a growing demand for value-added products like roasted and instant coffee, further fueling the export boom. Due to rise of cafe culture, higher disposable incomes and a growing preference for coffee over tea, coffee consumption in India is also steadily increasing. This trend has been observed particularly in both urban and rural areas. Domestic consumption has increased from 84,000 tonnes in 2012 to 91,000 tonnes in 2023. This surge reflects a broader shift in drinking habits, as coffee becomes a staple in daily life. India's coffee is primarily grown in the ecologically rich Western and Eastern Ghats, areas famous for their biodiversity. Karnataka leads in production, contributing 248,020 million tonnes in 2022-23, followed by Kerala and Tamil Nadu. These areas are home to shaded plantations that not only support the coffee industry but also play a vital role in preserving the natural environment, helping to maintain the ecological balance of these biodiversity hotspots.

India's Agri Boom: Rice, Wheat and Maize harvests fuel strong market outlook

Indian Rice Market Set for Record Harvest and Strong Export Rebound:

India, the world's largest rice exporter and second-largest producer, is poised for a record harvest in 2024-25, reflecting the resilience and growth of its agricultural sector. According to the Ministry of Agriculture, rice production is projected to touch 120 million metric tons (MMT), surpassing last year's 113.3 MMT. This increase is largely attributed to favourable monsoon rains and improved agricultural practices. The robust harvest aligns with the government's continued efforts to bolster domestic food security and reduce import dependency. This season's exceptional rice output follows a year of challenges when patchy monsoon rains affected production. With an additional one million hectares under rice cultivation compared to the previous year, the 2024-25 Kharif season has witnessed significant growth. The timely and widespread distribution of monsoon rains has not only replenished water resources but has also improved planting conditions across key rice-growing states, such as Uttar Pradesh, Punjab, and Haryana. Digital Crop Survey (DCS) data has revealed a substantial increase in acreage in Uttar Pradesh, showcasing the role of technology in modernizing India's agricultural landscape. Despite this optimistic production outlook, India's rice market dynamics remain nuanced. Government procurement under the Minimum Support Price (MSP) program has encountered logistical

AJAY KEDIA
MD & Research Head,
Kedia Advisory

challenges, leading to slightly slower initial procurement. However, procurement is expected to gain momentum, with 6.65 MMT already acquired by October 27, 2024, compared to 8.64 MMT in the same period last year. The government's efforts to manage surplus stocks, which stood at 38.7 MMT as of October 1, have also impacted market sentiments. Export restrictions on broken rice continue to ensure sufficient domestic supplies for ethanol production and animal feed. India's role in the global rice trade has been pivotal, despite a dip in exports to 15 MMT in the 2023-24 marketing year due to restrictions. With the removal of curbs on most rice types, exports are projected to rebound to 21 MMT in 2024-25. Competitive pricing and surplus stocks position India favourably in the international market, especially against rival exporters like Thailand and Vietnam. The expected global demand and favorable price parity further strengthen India's export outlook. India's rice market is experiencing a delicate balance of record production, robust domestic demand, and strong export potential. These factors are likely to exert upward pressure on prices in the coming months. As market adjustments unfold, the Indian rice market is expected to remain buoyant, with prices anticipated to surge, driven by both domestic demand and international factors.

India's Wheat Market: Rising Production and Strong Price Outlook:

India is among the world's largest producers of wheat, a staple crop crucial to

the nation's food security and agricultural economy. The production of wheat in 2024 is projected to be significant, with a 1.38% year-on-year increase in sowing. The total wheat-sown area for the 2024-25 rabi season has reached 320 lakh hectares, compared to 315.63 lakh hectares in the previous year. This growth reflects favorable climatic conditions and improved farmer confidence. Back-to-back western disturbances in key wheat-producing states such as Punjab, Haryana, Uttar Pradesh, and Rajasthan have enhanced soil moisture and reduced irrigation costs, further boosting the prospects for a bumper crop. The government's Minimum Support Price (MSP) policy remains a cornerstone of India's wheat market strategy. For the 2025-26 Rabi Marketing Season, the MSP for wheat is set at ₹2425 per quintal, providing a benchmark for procurement operations led by the Food Corporation of India (FCI). Recent initiatives by the Union Food Ministry aim to strengthen procurement mechanisms through district-specific targets, the expansion of procurement centres in remote areas, and prompt payments to farmers. To address anticipated storage challenges, the government is augmenting covered and plinth (CAP) storage capacity by 35 lakh metric tonnes (LMT), ensuring that the increased production can be effectively managed.

The government's Open Market Sale Scheme (OMSS) has played a pivotal role in stabilizing wheat prices amidst tight

supplies. In recent e-auctions conducted by the FCI, 94% of the 1.5 lakh tonnes offered were sold, with high bid prices in states like Assam and Odisha highlighting strong demand. These developments have prompted calls for additional wheat releases under OMSS to further moderate market prices ahead of the next harvest. Meanwhile, global trade policies under the World Trade Organization (WTO) continue to influence India's wheat market, with debates centered on subsidy caps and import tariffs. These policies have raised concerns about their potential impact on the Minimum Support Price (MSP) program and the Public Distribution System (PDS), both of which are critical for food security and farmer livelihoods. Looking ahead, wheat prices in India are expected to remain buoyant. Delhi Spot Wheat (FAQ) prices, currently at Rs 3325 per quintal, are projected to find strong support at around ₹2900. Over the next 30-40 days, prices could surge towards Rs 3600 per quintal, driven by robust seasonal demand, limited current supplies, and the anticipated effects of expanded procurement activities. This outlook underscores the dynamic interplay of domestic and international factors shaping India's wheat market.

India's Maize Market 2025: Record Production, Rising Demand, and Bullish Price Outlook:

Due to rising demand from the animal feed and ethanol production sectors, India's maize industry has seen tremendous expansion and change. Thanks to favourable monsoon conditions and an increase in planted land, maize production is expected to reach a record 38.5 million metric tonnes (MMT) in the 2024-25 crop year. Compared to the output estimate of 37.7 MMT for 2023-2024, this represents a significant increase. Over 60% of the world's maize is produced in states like Madhya Pradesh, Karnataka, and Maharashtra. Numerous government measures, including as the identification of high-yielding districts, crop diversification plans, and incentives for ethanol production, are responsible for the increase in maize planting. With an emphasis on areas like Andhra Pradesh, Bihar, and Tamil Nadu, the Ministry of

Agriculture hopes to increase maize acreage by one million hectares over the course of the next two years. In line with the government's drive for renewable energy sources, efforts to create high-starch maize cultivars should improve ethanol recovery. The demand for maize is still rising, mostly due to the livestock and poultry industries, which use 60-65% of the total production for feed. In order to meet the demands of both feed and biofuel production, the government plans to raise maize production by 10% to 42 MMT by 2025-2026. The ethanol industry is also becoming a major user. It is anticipated that the construction of ethanol plants in states like as Bihar will give farmers access to a profitable alternative market, hence decreasing their reliance on conventional purchasers.

India has maintained a restrictive import policy for maize, with MY 2024-25 imports predicted at 500,000 MT, despite the strong domestic production. Duty-free channels for specific industries make this possible. India is

expected to export 300,000 MT of maize, which reflects a consistent demand in international markets. Due to record production, rising demand, and encouraging government policies, the Indian maize market is expected to expand. It is anticipated that maize prices in important markets such as Gulabagh (Bihar) will find solid support at Rs 2,550 per quintal in the upcoming

months. Prices are expected to rise from the present levels of Rs 2,700 to Rs 2,950 due to strong demand from the ethanol and feed sectors. Because market fundamentals continue to support price stability and growth, the outlook is still optimistic.

Milk Powder: no more uptrend in February

The supply of liquid milk reported to be at 58/58.5 crore litres in the plants of North India during the last one month, due to this, the production was around 46.50/47 thousand tonnes in the plants of the country. Here, the consumption of the stock increased by 22/23 percent, due to this, the manufacturing companies of milk powder have been selling the stock after the increment of Rs 10 to Rs 305/315 per kg in the plants of North India. Now, milk powder is being traded at Rs 230/235 per kg from the plants of Maharashtra and Tamil Nadu as per the quality, due to which, the prices of milk powder showed downfall as expectedly. Now, the weather seems favourable, due to which, the production reported to be similar, on seeing this, the prices may not show more uptrend during the coming days.

Desi Ghee possibility to improve

The delivery of previous export deals of butter reported to be constant during the last one month and the new deals seems weak as compared to the December, despite this, there is a shortage of the stock in the plants, due to this, the prices of premium quality desi ghee gained by Rs 20/25 to Rs 550/555 per kg in the consumer pack. The inferior quality sample stock also being quoted at Rs 510/520 per kg. Apart from this, the inferior quality stock also ruling at Rs 7000/7500 per quintal in the big tins. Its premium quality stock also reported to be sold at Rs 8550/8875 per 15 kg in the big tins. Here, the prices of butter went up by Rs 20 to Rs 425/435 per kg excluding GST. Now, the prices may not show more uptrend in these prices and it may show expected correction in the prices, due to this, it is not profitable to sell the stock at the current level during the coming days.

Rice trade seems weak

The export does not seems favourable during the last one month and all-round selling seems constant from the stockists due to the lack of rupee in the rice industry, due to which, the market of rice sela 1509 and its steam reduced by Rs 300 to Rs 5200 and Rs 6000 per quintal respectively. Similarly, rice sela 1718 also being available at Rs 5300 per quintal, but the traders are not purchasing the stock at the higher level from the mills during the second half of the month, due to this reason, it is being quoted at Rs 5450 per quintal. On the other hand, both the local and the upcountry demand of inferior quality stock showed improved trend, due to this, its prices strengthened by Rs 100 per quintal, after this, the market remained strong at the current level. The reality is that the export demand of rice does not seems favourable and huge amount of paddy and rice stock has been lying at the current level, due to which, the traders have been selling the stock at the current level, whereas, the milling price reported to be unfavourable. Therefore, the market may show uptrend due to the increment in the demand. On the other hand, the prices ascended by Rs 200/300 per quintal owing to the all-round buying from the exporters in the bold rice and the export seems good from the Indian ports, due to which, the prices may show uptrend during the month of February.

US winter wheat plantings up from 2024

Farmers last fall planted more acres to winter wheat for harvest in 2025 than they did for 2024, but fewer than 2023 and just shy of the five-year average acreage, according to the US Department of Agriculture (USDA). Seedings of winter wheat for harvest this year were estimated at 34.115 million acres in data issued Jan. 10 by the USDA's National Agricultural Statistics Service. The acreage estimate was up from 2024 winter wheat plantings and exceeded analysts' expectations that averaged 33.4 million acres issued ahead of the annual Winter Wheat and Canola Seedings report. Throughout much of the planting season, seeding progressed at a similar pace to the five-year average and reached 97% completion by Nov. 24. Seedings of 34.115 million acres were up 725,000 acres, or 2.2%, from 33.39 million acres in 2024 but were down 7% from 36.699 million acres in 2023, which was the peak planted area in the current decade, and down 27% from 46.781 million acres in 2008, the high mark in the current century. Versus the all-time high of 65.547 million acres in 1981, the 2025 area was down 48%. The USDA's by-class winter wheat plantings estimates indicated a larger acreage increase in the Central states than in the Plains. Hard red winter wheat seeded acreage in 2025 was estimated at 24 million acres, up 1% from 2024, while soft red winter wheat plantings were estimated at 6.44 million acres, up 6% from last year. White winter wheat seeded area was estimated at 3.64 million acres, up 3% from 2024.

In the hard red winter states of the Southwest — Colorado, Kansas, Nebraska, Oklahoma and Texas — 2025 crop winter wheat seedings were 20.52 million acres, down 30,000 acres, or 0.1%, from 2024 and compared with 22.48 million acres in 2023. The Southwest accounted for 60% of all winter wheat acreage in 2025 compared with 62% in 2024 and 61% in 2023. Winter wheat plantings in the Central states — Illinois, Indiana, Ohio, Michigan and Missouri — were estimated at 2.96 million acres, up 290,000 acres, or 11%, from 2.67 million acres in 2024. The region accounted for 9% of total winter wheat plantings in 2025, up from 8% the year before. Plantings in the 10 soft wheat states of the Southeast — Alabama, Arkansas, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee and Virginia — were 2.095 million acres, up 70,000 acres, or 3%, from 2.025 million acres the year before. Plantings in the Southeast equated to 6% of total winter wheat acreage, unchanged from 2024. In the white wheat states of the Pacific Northwest — Idaho, Oregon and Washington — winter wheat plantings for harvest in 2025 were forecast at 3.36 million acres, up 60,000 acres from the year before and once again accounting for about 10% of the winter wheat planted area.

States with the largest year-to-year changes in winter wheat plantings, by acres, begin with South Carolina, up 45,000 acres, or 56%, from last year. Other states with large percentage increases were Alabama (up 36%), California (24%), Georgia (31%), Michigan (38%), Montana (15%), Ohio (27%) and Virginia (33%). Plantings in three states — Arkansas, Tennessee and South Dakota

— were tied for the largest year-over-year decrease, down 8%. Other notable acreage declines included Delaware (down 7%), Kentucky (7%), Missouri (6%) and North Carolina (7%). Kansas winter wheat acreage was forecast at 7.4 million acres, down 200,000 acres, or 3%, from 7.6 million in 2024. Kansas was forecast to have the largest winter wheat planted acreage in 2025, accounting for 22% of total US winter wheat plantings. Texas ranked second in plantings followed by Oklahoma. The fourth largest winter wheat area in 2025 was Montana, at 2.25 million acres, up 300,000 acres, or 15%. Colorado was the fifth-largest winter wheat state by area with 2025 crop plantings estimated at 2.1 million acres, unchanged from 2024. Seedings of durum in Arizona and California for 2025 harvest tumbled to 75,000 acres, down 11% from 2024 but up 34% from 2023.

CPO

less possibility to decrease

In Indonesia, CPO prices reduced by \$100 to \$1145 per tonne. In Kandla, CPO January delivery prices went down by Rs 450 to Rs 9700 per quintal because of the weak vegetable ghee manufacturers and downfall in the international markets. However, the storage of CPO reported to be weak as compared to the previous year because of the sluggish production in Malaysia and Indonesia. Apart from this, the Indonesia has increased the quantity of palm oil in Bio-diesel from 35 percent to 40 percent, due to this, the prices of CPO showed uptrend due to the weak selling, but after this, the market has remained under pressure owing of the profit taking selling. During the review week, the prices of CPO February delivery dropped down from 4740 Ringgit to 4482 Ringgit owing to the profit taking selling from the speculators. The March delivery also eased from 4587 Ringgit to 4321 Ringgit per tonne. However, the prices of raw oil showed nominal fluctuations in the international markets. The government has increased the tariff rates from \$1203 to \$1137 per tonne. In the foreign exchange market, the prices showed downfall against the American dollar during the review week.

There is no possibility of more decrement in the prices of CPO on seeing the current situation. The uptrend in the prices depends on the international markets. The market may likely to move in the limited area during the coming days.

Mustard

less possibility to increase

In January month, the prices of mustard reduced by Rs 400 per quintal due to the weak demand from the mills and there is no possibility of more downtrend in the prices during the near future. At Lawrence Road, the prices of mustard went down by Rs 400 to Rs 6000/6050 per quintal owing to the constant selling from the stockists and weak demand from the mills along with the sluggish offtake. In Najafgarh mandi, its prices also being quoted at Rs 5800/5900 per quintal in loose. There were around 2 lakh bags of mustard reported to arrive in the various markets of the country on daily basis. In Agra, the prices of mustard 42 percent conditioned also fell down by Rs 350 to Rs 6900 per quintal because of the weak demand. The prices of mustard 42 percent conditioned also jumped by Rs 400 to Rs 6125 per quintal because of the sluggish offtake. In Alwar, the prices were at Rs 5800 per quintal. The prices of mustard 42 percent conditioned also jumped by Rs 400 to Rs 6125 per quintal because of the weak offtake in the markets of Rajasthan. In Alwar, its prices also ruling at Rs 5800 per quintal. The mustard is being produce majorly in Rajasthan, Haryana, UP, MP, Gujarat, Chattisgarh and Uttarakhand. The stock of mustard has been sown in around 88.50 lakh hectares during the second fortnight of January, whereas, it was around 93.30 lakh hectares during the same period of the previous year. The production of mustard reported to be high due to the favourable weather conditions despite the weak acreage of sowing. Presently, huge amount of stock has been lying to the government agencies. During the review week, the rupee showed downfall as compared to the American dollar in the Foreign Exchange Market, due to this reason, there is no possibility of more downtrend in the prices of imported oils. The market may show downfall on seeing the current situation during the coming days.

Soybean

no possibility to decrease

The nominal amount of soybean has been started arriving in the markets of Brazil, after this, the stock of Argentina has also been arriving started arriving constantly, due to this reason, the market of soybean has remained under pressure in the domestic markets. In Jalgaon, soybean prices remained stable at Rs 4255 per quintal in the first week of January. After this, its prices ascended by Rs 125 to Rs 4350 per quintal in the second week due to the increased buying. Apart from this, soybean prices jumped by Rs 50 to Rs 4400 per quintal owing to the limited buying in the last three days and in the last week, its prices gained by Rs 25 to Rs 4425 per quintal. In Indore, the prices of famous oilseeds ascended by Rs 100 per quintal in the review period. If the production of soybean will remain same as expected then it showed record uptrend of 17 crore tonnes in Brazil. Apart from this, in Argentina, the production of soybean will likely to be remain 4.80 crore tonnes. Around 2.50 lakh tonnes of the stock expected to be produce. The crop of both the countries will likely to arrive from January to February. On the other hand, the new crop of soybean has been ruling in the markets, due to this reason, in Chicago, the prices of soybean showed downfall as compared to the last four year and presently, its prices remained stable at \$10.60 per bushel. The tariff rates reported to be high after the US president hold his power. After this, there is a strong possibility of increasing trade tensions with China which is the biggest importer country of the world. The tariff rates reported to be increase by 10

percent. The arrival pressure of soybean may show uptrend in the international markets and it showed downfall from the last four years. The import of edible oils reported to be weak in the month of December. In December 2024, around 1231426 tonnes of soybean reported to be import as per SEA which was around 6 percent less than the same period of the previous year. Both Indonesia and Malaysia wants to increase the price after the increment in the consumption of palm oil in biodiesel. In February, nominal amount of mustard crop has been started arriving in MP. Therefore, the market of soybean will likely to move in the limited area during the coming days.

Soya oil

no more downfall

The government has decreased the tariff rates of soya oil from \$1103 to \$1074 per tonnes. During the last one month, soya refined prices descended by Rs 200 to Rs 13000 per quintal due to the weak demand and constant downfall in the tariff rates. In Mumbai, its prices declined by Rs 200 to Rs 12400 per quintal because of the weak offtake. Similarly, its prices reduced in the same ratio to Rs 12400/12500 per quintal in the markets of MP. The production of soybean was around 125 lakh tonnes in the country during the current season. Whereas, it was around 118 lakh tonnes during the same period of the previous year. The arrivals of soybean was around 2/2.50 lakh tonnes in the markets of Maharashtra, Rajasthan and MP. Apart from this, the prices of soybean plant delivery rose by Rs 200 to Rs 4300/4425 per quintal in the markets of MP, Rajasthan and Maharashtra. However, the prices of soya refined descended from Rs 12500 to Rs 12200 per quintal in Kandla due to the constant selling from the importers. There is no possibility of more downtrend in the prices during the coming days.

Gur no more downfall

The prices of gur reduced by Rs 400/500 which stood pedi at Rs 3700/3800 and dhaiya at Rs 3900/4000 per quintal respectively during the last one month due to the weak demand and increased arrivals of the stock from the markets of Western UP. In Hapur mandi, gur balti prices descended from Rs 1450/1520 to Rs 1250/1325 per 40 kg. In Hapur mandi, around 5 trucks of gur reported to arrive at the current level. In Muradnagar mandi, the prices of gur pedi declined from Rs 4250 to Rs 3100 per quintal, but now, it is ruling at Rs 3600 per quintal. The prices of kolhu and crusher sugarcane also being quoted at Rs 360/370 per quintal in UP. In Muzaffarnagar mandi, the prices of gur chaku went down from Rs 1415/1675 to Rs 1375/1450 per kg due to the weak arrivals. Laddu price also descended from Rs 1510/1635 to Rs 1400/1425 per 40 kg. In contrary to this, raskat prices gained by Rs 50 to Rs 1200/1230 per quintal due to the constant demand from the alcohol manufactures. Presently, around 8000 bags of gur reported to arrive in the markets on daily basis. In Mumbai, the prices were at Rs 5000/5500 per quintal because of the limited buying and selling. The ganna crop reported to be good due to this increment in the sowing areas and favourable weather conditions. It is expected that the demand from the stockists may show uptrend, due to this, there is no possibility of more downfall in the prices. Apart from this, the market may show uptrend during the near future.

Sugar no possibility to decrease

The prices of sugar mill delivery rose by Rs 150 to Rs 3900/4100 per quintal due to the selling of the stock by the mills at the higher level and increased demand. Spot sugar prices also gained in the same ratio to Rs 4250/4400 per quintal. In Mumbai, the prices of sugar ascended by Rs 150/175 which stood S-grade at Rs 3722/3822 and M-grade at Rs 3786/3902 per quintal respectively because of the weak selling. The prices of sugar have been quoted up by Rs 150 per quintal by the mills of Uttaranchal. The government has allotted 22.50 lakh tonnes of sugar for the January month as compared to the previous month. The production of sugar descended from 320 lakh tonnes to 270 lakh tonnes during the current season, whereas, the consumption was around 270 lakh tonnes in the country. Apart from this, the government has allotted 10 lakh tonnes of export and the minimum support price of sugar rose from Rs 3100 to Rs 4200 per quintal by the sugar industry. The government has not increased the minimum support of sugar from 2019 till now, whereas, the prices of sugarcane have showed uptrend, due to this reason the production cost reported to be high. The government has been planning to increase the minimum support price of sugar. There is no possibility of more downfall in the prices on seeing the current

circumstances. It is expected that the market may show uptrend during the coming days.

South Africa to remain net corn exporter

South Africa will remain a net exporter of corn in marketing year 2024-25 despite challenging weather that has lowered the forecast for planted area to 3 million hectares with production of 16 million tonnes, according to a report from the Foreign Agricultural Service (FAS) of the US Department of Agriculture. In its Jan. 22 report, the FAS said South Africa's 2024-25 production season started off slowly with sporadic rainfall during October 2024 and a heatwave in November 2024, affecting the progress in corn plantings. In mid-December, improved and sustained rainfall over most parts of South Africa's corn production areas began to reshape the outlook. Early season plantings that suffered during the heatwaves recovered or were replanted, except in some areas

where producers struggled to get into fields to finish sowing due to the wet conditions, according to the FAS. In general, corn plantings in 2024-25 are later than the five-year average due to the delayed rains. "Weather forecasters predict La Niña weather conditions for the rest of the season, which generally supports sufficient rainfall and conducive production conditions in South Africa's corn producing area," the FAS said.

The 2023-24 corn crop suffered tremendously from drought, falling to 13.3 million tonnes, or 22% less than the previous marketing year, necessitating imports. Previous estimates for the commercial demand for corn in 2023-24 and 2024-25 upward to 12.2 million and 12.4 million tonnes, respectively, on higher animal feed demand. South Africa should maintain its status as a net exporter of corn in 2024-25 with an expected commercial crop above 15 million tonnes. However, the FAS revised its previous forecast for exports downward to 1.5 million tonnes on relatively lower expected planted area that will reduce corn availability for export, coupled with an expected higher demand for corn in the local feed industry. "South Africa is expected to export about 2 million tonnes of corn in 2023-24," the FAS said. "South Africa's corn exports focus mainly on neighboring countries where import demand is elevated after last year's drought-stricken season." South Africa is not expected to import any corn to meet domestic demand in 2024-25 after importing 800,000 tonnes in 2023-24. The country imported 465,000 tonnes of yellow corn from Argentina and Brazil and the first shipment of 23,768 tonnes of white corn from the United States arrived after genetic engineering issues were resolved. Year-end stocks are forecast to recover from the abnormally low levels estimated for 2023-24, expanding by 75% to 1.4 million tonnes in 2024-25 on higher local production and less exports, to equal about six weeks of commercial utilization.

Wheat exports from Russia in February may become a record low for 5 years

In February, wheat exports from Russia may be half as much as a year earlier, as prices for the grain continue to rise, according to the Rusagrotrans Analytical Center. "The forecast of wheat exports for February based on the lines available to Rusagrotrans is 2.2-2.3 mln tonnes, which is 2 times lower than last year (4.4 mln tonnes) and the lowest level since February 2020 (1.9 mln tonnes)," the report says. February will continue the trend of January, by which wheat exports including the EAEU countries are estimated to reach 2.54 mln tonnes, compared to 4.08 mln tonnes a year ago. Export prices for Russian wheat (12.5% protein) for February-March delivery increased to \$242 per tonne FOB. "For

the first time in the current season, prices reached the level of the 2023/2024 season, while in July-December 2024 they were lower than a year earlier. The price increase is taking place against the background of a significant decrease in supplies from Russia in January 2025 and expectations of this trend to continue in February," the analysts said. The export potential of Russia's main competitor, Ukraine, is also declining.

RKG Grain Sorting Solutions Pvt. Ltd. marketing A-MECS Color Sorter across the globe

The color sorter market is rising significantly, as the demand for high-end, cost-effective solutions is increasing. To meet this surging demand, RKG Grain Sorting Solutions Pvt Ltd is providing its A-MECS color sorter across the world. Headquartered in Seoul, South Korea and main branch in New Delhi, India the company is an authorized representative of M/s. ATS International Co., Ltd, Korea for marketing A-MECS color sorter machines. A-MECS contributes to development in food processing industries by providing color sorter which enables one to get safe and clean food with high productivity and high quality. RKG Grain Sorting Solutions Pvt Ltd is a prestigious trader and supplier of Grain Color Sorter, Tea Sorter, Belt Type Color Sorter, Magnetic Sorter, Circulating Grain Dryer and many other products. Furthermore, the company also renders color sorter services to the clients. For meeting clients' demands, they are assisted by a team of dexterous personnel. Owing to meticulous efforts of appointed professionals, competitive rates and patron focused policies, they have garnered numerous loyal patrons, across the market. The company is supplying its products to Nepal, Dubai, Africa, Bahrain, Sri Lanka apart from Bangladesh.

The company has many installations in Europe and USA. ATS International Co. Ltd. is an overseas company for marketing A-MECS Color Sorter since 1999. As the world opens its eyes to the need of sorting food grains automatically, A-MECS is providing high level of sorting solutions. They specialize in supplying highly advanced color sorter machines for clean and reliable food. The company has an excellent after-sale service group, providing professional training & technique instructing. They have adopted the service model of responding rapidly, perform maintenance quickly and follow-up closely. Their continued support ensures that the machines are commissioned and operated to provide effective, efficient performance and long life.

Vision & Mission:

With a vision of delivering great value to clients, RKG Grain Sorting Solutions ensures that their clients' expectations are met in totality, as per their specific needs and requirements. RKG Enterprises/ATS International strives to emerge as a trusted and knowledgeable business partner by achieving continuous product development through sourcing excellence and flexibility. The company also invests in productive resources and enhances its supply & distribution, so as to deliver tailor made products as per client specifications at the most competitive rates. Quality being one of its core business values, the company maintains a strict Quality Policy in their organization and conducts each and every business operation in congruence with their quality commitment to customers. Faith and Creation are their motto. They try to be

creative so that they can support customers well and develop new sorting solutions for customers' requirements.

Wide range of products:

Company's products are rich in variety, from household to large production to meet the needs of various types customers, but also according to customer's demand for customized models. Moreover, their enthusiastic team strives to provide customized solutions for all yours sorting needs.

A-MECS Full Color Tri Chromatic/ CCD image capturing system with high speed data transmission is strong enough to stabilize and resist interference. The machine applies light source to optimize the lighting effect ensuring accurate information of material and rejecting all the impurities. This features High Quality Cameras, Image Processing System, Flexible Light Source Technology, Dust Cleaning System etc.

Tea Sorter Machines - Tea color sorter machine is perfectly fine for sorting color of tea and is available at market leading prices. Sourced from the authentic vendors of the market, this sorter machine is rigorously tested on several measures to ensure its excellent functionality before delivery.

Circulating Grain Dryer - It is ideal for drying all kinds of grains thereby widely demanded in food processing industry. Offered grain dryer machine is widely demanded in agricultural sector and is manufactured by utilizing ultra-modern technology and standard quality components laid down by predefined industry norms of quality.

Color Sorter Machines - With our rich industry experience and knowledge, they are engaged in trading and supplying an extensive array of Color Sorter Machines that is sourced from the

reliable and genuine vendors of the market. They have marked a distinct position in the market by providing a high quality range of Grain Color Sorter Machines that is designed for food industry. The offered machines are used to inspect the quality and color of grains, pulses and seeds before packaging. Also, they have emerged as a leading trader and supplier of superior quality Color Sorting Equipment. This equipment is immensely preferable to sort food grains, seeds, tea leaves and rice with maximum efficiency.

Wheat no long uptrend

The prices of wheat fluctuates by Rs 75/125 per kg during the last one month because of the temporary sale policy of the government. During the review period, the prices of wheat for mill quality is being traded at Rs 3210 per quintal, after this, it is ruling at Rs 3340 per quintal owing to the shortage of supply. After this, the government has increased the sale of wheat from one lakh tonnes to 1.5 lakh tonnes weekly, after this, the market went down to Rs 3275 per quintal. It is expected that the crop of wheat will likely to arrive after two months, due to this, the prices may not show more fluctuations. Therefore, it is not profitable to trade at the current level, but the government wants to decrease the prices, in this situation, it may increase the quantity of the stock. Therefore, the production of the stock may decrease due to the expectations of less amount of yields.

Millet government policy may affect

The trade of millet reported to be weak during the last one month and the stockists are selling the stock at the lower level due to the downfall in the prices of maize and the sale policy of the rice, due to which, the prices of slipped by Rs 100/125 to Rs 2200/2300 per quintal in the markets. In Mauli Barwala reach, the millet which was being sold at Rs 2700 per quintal, but now, it is ruling at Rs 2570 per quintal. Some stock also being available at Rs 2550/2555 per quintal. Now, the traders are not selling the stock at the lower level because almost 32/33 percent of the stock has been included in the foodgrains. Therefore, the prices may show uptrend from here.

Maize: no possibility to decrease

The government has been allotted the maize quota of 24 lakh tonnes at Rs 2250 per quintal to the ethanol companies during the last one month, due to this, the traders are doing panic selling, due to which, the prices of maize reduced by Rs 150/160 to Rs 2275/2325 per quintal in the markets of Rajasthan and MP. Here, maize has been ruling at Rs 2775 per quintal in Haryana and Punjab reach, but now, it is being traded at Rs 2600/2625 per quintal. Apart from this, the average quality maize also being available at Rs 2525/2550 per quintal. Now, the market remained stable at the same level in these prices and the prices may increase by Rs 125/130 per quintal during the next one month because of the shortage of stock in the poultry and the starch mills.

Tur downfall after the strong trend

There is an all-round swamp of downfall in the prices of tur in Chennai and Delhi due to the weak selling of lemon tur in Burma during the last one month. Here, it was being sold at Rs 81 per kg, but now, it is ruling at Rs 71 per kg. In Chennai, the prices may decrease by Rs 11 to Rs 67 per kg during the last one month. In Burma, tur was being sold at \$840 per tonne in Burma, but now, it is ruling at \$770 per tonne and the further deals have been done after the decrement of \$15 per tonne, on seeing these circumstances, the market may show downfall during the coming days.

Agriculture is the first engine for India's development journey: Budget 2025-26

Union Minister for Finance and Corporate Affairs Smt Nirmala Sitharaman presented Union Budget 2025-26 in the Parliament on 01st February 2025. Emphasizing 'Agriculture as the first engine' for India's development journey, Union Budget 2025-26 tabled in Parliament by Smt. Sitharaman, announced a slew of measures to spur Agricultural Growth and Productivity, thereby benefitting the Annadata. Announcing the Government's decision to establish a Makhana Board in Bihar, Smt. Sitharaman said it will improve production, processing, value addition, and marketing of makhana as well as support the people engaged in these activities to be organized into Farmer Producer Organizations (FPOs). She added that the Board will provide handholding and training support to makhana farmers and also work to ensure they receive the benefits of all relevant Government schemes. The Minister stated that a National Mission on High Yielding Seeds will be launched with an aim to strengthen the research ecosystem, targeted development and propagation of seeds with high yield, pest resistance and climate resilience, and commercial availability of more than 100 seed varieties released since July 2024. To provide conservation support to both public and private sectors for genetic resources and ensure future food and nutritional security, the Minister said that the second Gene Bank with 10 lakh germplasm lines will be set up.

Announcing the 'Mission for Cotton Productivity', Smt. Sitharaman highlighted that the five-year mission will facilitate significant improvements in productivity and sustainability of cotton farming, and promote extra-long staple cotton varieties. She said the mission will benefit lakhs of cotton growing farmers as the best of science & technology support will be provided to farmers. Aligned with the Government's integrated 5F vision for the textile sector, the Minister remarked that the mission will help in increasing incomes of the farmers as well as ensure a steady supply of quality cotton for rejuvenating India's traditional textile sector. Noting the importance of Kisan Credit Cards (KCC) in facilitating short term loans for around 7.7 crore farmers, fishermen, and dairy farmers, the Minister announced the enhancement of loan limit under the Modified Interest Subvention Scheme from Rs 3 lakh to Rs 5 lakh for loans taken through the KCC. Smt. Sitharaman announced the setting up of Urea plant with annual capacity of 12.7 lakh metric tons at Namrup, Assam. This, she said will further augment urea supply and help to achieve Atmanirbharta in urea production, along with the recently reopened three dormant urea plants in the Eastern region. Highlighting that India ranks second-largest globally in fish production and aquaculture with the Seafood exports valued at Rs. 60 thousand crore, the Union Minister remarked that the Government will bring in an enabling framework for sustainable harnessing of fisheries from Indian Exclusive Economic Zone and

High Seas, with a special focus on the Andaman & Nicobar and Lakshadweep Islands, which will unlock the untapped potential of the marine sector.

Specific proposals proposed in the Union Budget to strengthen productivity and resilience in agriculture are as follows:

Prime Minister Dhan-Dhaanya Krishi Yojana-Developing Agri Districts Programme: The Union Finance Minister stated that motivated by the success of the Aspirational Districts Programme, the Government will undertake a 'Prime Minister Dhan-Dhaanya Krishi Yojana' in partnership with states. Through the convergence of existing schemes and specialized measures, the programme will cover 100 districts with low productivity, moderate crop intensity and below-average credit parameters. The programme aims to enhance agricultural productivity; adopt crop diversification and sustainable agriculture practices; augment post-harvest storage at the panchayat and block level; improve irrigation facilities and facilitate availability of long-term and short-term credit. This programme is likely to help 1.7 crore farmers.

Building Rural Prosperity and Resilience: A comprehensive multi-sectoral 'Rural Prosperity and Resilience' programme will be launched in partnership with states, added the Union Finance

Minister. This will address under-employment in agriculture through skilling, investment, technology, and invigorating the rural economy. The goal is to generate ample opportunities in rural areas so that migration is an option, but not a necessity. She further added that the programme will focus on rural women, young farmers, rural youth, marginal and small farmers, and landless families. The programme aims in catalyzing enterprise development, employment and financial independence for rural women; accelerating creation of new employment and businesses for young farmers and rural youth; nurturing and modernizing agriculture for productivity improvement and warehousing, especially for marginal and small farmers and diversifying opportunities for landless families. The Union Finance Minister further highlighted that the global and domestic best practices will be incorporated and appropriate technical and financial assistance will be sought from multilateral development banks. In Phase-1, 100 developing agri-districts will be covered.

Aatmanirbharta in Pulses: Smt. Nirmala Sitharaman highlighted that the Government is implementing the National Mission for Edible Oilseed for achieving atmanirbharta in edible oils. The Government made concerted efforts and succeeded in achieving near self-sufficiency in pulses. Farmers responded to the need by increasing the cultivated area by 50 per cent and Government arranged for procurement and remunerative prices. Since then, with rising incomes and better affordability,

consumption of pulses has increased significantly. She further emphasized that the Government will launch a 6-year "Mission for Aatmanirbharta in Pulses" with a special focus on Tur, Urad and Masoor. The Mission will place emphasis on development and commercial availability of climate resilient seeds; enhancing protein content; increasing productivity; improving post-harvest storage and management and assuring remunerative prices to the farmers. Central agencies (NAFED and NCCF) will be ready to procure these 3 pulses, as much as offered during the next 4 years from farmers who register with these agencies and enter into agreements.

Comprehensive Programme for Vegetables & Fruits: The Union Finance Minister said that it is encouraging that people are increasingly becoming aware of their nutritional needs. It is a sign of a society becoming healthier. With rising income levels, the consumption of vegetables, fruits and Shree-Anna is increasing significantly. A comprehensive programme to promote production, efficient supplies, processing, and remunerative prices for farmers will be launched in partnership with states. She further added that appropriate institutional mechanisms for implementation and participation of farmer producer organizations and cooperatives will be set up.

Grameen Credit Score: The Union Finance Minister stated that Public Sector Banks will develop 'Grameen Credit Score' framework to serve the credit needs of SHG members and people in rural areas.

Centre is trying to make India food basket of the world:

Smt. Sitharaman while presenting her eighth budget, said the Centre is trying to make the country a food basket of the world. Ms. Sitharaman said the Centre will establish a National Institute of Food Technology, Entrepreneurship and Management in Bihar. "The institute will provide a strong fillip to food processing activities in the entire Eastern region," she said. The Minister said a second Gene Bank with 10 lakh germplasm lines will be set up for future food and nutritional security. "This will provide conservation support to both public and private sectors for genetic resources," she added.

The allocation for the Food and Public Distribution Ministry increased to Rs 2,11,406.37 crore from Rs 2,05,474.97 crore in 2024-25 revised estimates. Out of this, Rs 2,03,420 crore is for food subsidy schemes, primarily for the Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY). In the last

budget, the total allocation was Rs 2,13,019.75 crore. For the Ministry of Food Processing Industries, the allocation in this budget is Rs 4,364.22 crore. In the last revised estimates, it was Rs 2,796.79 crore. The major increase is for the Prime Minister Formalisation of Micro Food Processing Enterprises Scheme (PM FME). "The provision is for the scheme rolled out as a Centrally Sponsored Scheme in 2020 under Atma Nirbhar Bharat Package to benefit two lakh micro food processing units in the unorganised segment of food processing industry and to promote formalisation of the sector over a period of five years," the budget documents noted.

R. B. International Shipping Pvt. Ltd

Worldwide freight forwarder, Ship charterers & shipping agent

R.B. International was established with the objective of acting as Shipping Agent, Charter Broker, International Freight Forwarder, Custom House Agent and Project Consultant to provide total logistic solutions under one roof. The group has its registered office in Mumbai and other ports covering the East and West coast of India. The group is founded by experienced and well known person in the shipping & Logistics service industry, Mr. Ranjeet B Singh, who as Managing Director of the company took the company to new heights with his astuteness and business acumen. The company has professional team of personnel providing logistic solutions from time to time. The group is managed by experienced professionals who have the knowledge of shipping and allied trade. Their team of professionals regularly monitors the cargo movements into and of the Indian sub-continent region and have very good relations with the various consignees and shippers respectively. The group also has an excellent rapport with the port, customs and other concerned authorities. The R. B. International Group has following companies under its umbrella:

- R. B. International Shipping Pvt. Ltd
- R. B. International
- Royal (India) Shipping & Logistics
- R. B. Enterprises

R.B. International offers their customers the most effective and economical logistics solutions with the most recent market trends and innovations. They have established a solid image as a

Ranjeet B. Singh

Managing Director

Mob.: +91-98336 66995, +91-98216 44444

trustworthy transportation partner for companies in a variety of sectors thanks to their emphasis on innovation and constant development. The company is dedicated to offer comprehensive logistics options that can assist companies in streamlining their processes and achieving their objectives. They have the knowledge and tools to support you whether you're trying to improve your transportation skills or optimise your supply chain. They are proud to announce that they have strong relation in below mention areas: Mediterranean, U.K., North Continent, Scandinavia, USA, Canada, Atlantic & Pacific Ports, South & Central American, Caribbean, Far East, China, Japan, Australia, New Zealand & Pacific Islands, West Asia Gulf, Upper Gulf, Red Sea, South & West African Ports, Black Sea, East European & CIS destinations.

Services they Offer:

Air Freight: For products that must be delivered quickly or are of high worth, air freight is a popular option. In comparison to other forms of transportation like road transportation or marine freight, it can offer a faster and more dependable delivery choice for foreign goods. Perishable products like food or medicines that need to be transported quickly to keep their quality and integrity can also be shipped by air.

Sea Freight: A broad range of products, including raw materials, consumer goods, technology, equipment, and vehicles, can be transported by sea. It makes use of cargo containers, which are carried to their location by ships after being loaded onto them. The details of a cargo, such as reserving room on the ship,

making arrangements for customs processing, and organising the transfer of the products to their location, are usually handled by freight handling firms or shipping agencies.

Door To Door Logistics: Usually, the sender gets in touch with the transportation company to arrange for a retrieval of the products. A pickup vehicle or van will then be dispatched by the logistics company to the sender's address to gather up the products. Depending on the distance and type of goods being carried, the goods will then be delivered to the location using a variety of means of transportation, such as vehicles, ships, or aeroplanes.

Project, ODC and Bulk Cargo: Project cargo is a term used to describe big, intricate, and frequently custom-made cargo that needs specialised handling and transit. Over Dimensional Cargo (ODC) is a term used to describe cargo that surpasses the typical weight or size restrictions for transit. Bulk cargo is a transportation term for big quantities of products that are usually not individually

packaged or contained.

LCL Consolidation: Multiple cargoes from various shippers are combined into a single container during LCL consolidation, which is then transported to its location. This lowers the total cost of transportation and enables companies to split the cost of shipping. LCL consolidation is, overall, an economical and effective method for small and medium-sized companies to export their products.

Customs Clearance: Customs clearing is the process of moving products past customs checkpoints while making sure they adhere to regional laws and global trade agreements. To enable the efficient and lawful import or exit of products across borders, it entails preparing and sending the necessary paperwork to the relevant authorities and agencies. Although customs clearance can be a difficult and drawn-out procedure, it is necessary to make sure that products are moved lawfully and securely across borders.

eminence

EQUIPMENTS

FUTURISTIC TECHNOLOGY

World Renowned Manufacturing Specialist

Eminence Equipments Pvt. Ltd.

A global icon in manufacturing equipments and machinery

Manufacturing equipments that give the most efficient performance

Eminence Equipments Pvt. Ltd. is renowned 'Rice Mill / Flour Mill / Feed Mill / Seed Plant Machinery Manufacturer' having manufacturing unit at Pune, Maharashtra. Their factory is built on an area of 80,000 Sq. Feet and they are working in the industry for more than 27 years. The ISO 9001:2008 Certified company has state of art & world class manufacturing facility with on-time project delivery as priority. They have CNC LASER cutting machine TRUMPF make Model TL 3030 having power of 4KW & TRUMPF make Model TL 2530 machine. The maximum sheet thickness cut on the machines is 16mm M.S & 12mm SS. They have installed CNC Hydraulic Press Brakes (Model: EHP 110.31/25 cap: 110 Ton) & (Model: EHP 260.31/25 cap: 260 Ton) of Hindustan Hydraulics. They also have a set up of Paint Booth, Powder coating booths & Oil fired Ovens along with conveyerised system for painting of our products. The pre-treatment and phosphating with seven tank process is performed before painting (Powder coating) operation. Their immense hard work and innovation towards providing value to clients have made them the proud winners of Quality Bards and EEPC (Engineering Export Promotion Council) awards.

Eminence Product Range Includes:

1. Drag Bush Enmass Grain Feeders (Enmass Chain Conveyers) Capacity: 5 TPH to 250 TPH
2. Centrifugal discharge high speed Grain Dischargers (Bucket Elevators) Z type Slow speed Grain Dischargers (Z Type Bucket Elevators) Z type Slow speed Grain Dischargers (Z Type Bucket Elevators) Capacity: 2 TPH to 250 TPH
3. Portable Truck Loaders and Stackers for Bag Handling Ranging from 12 Mtrs long upto discharge height of 6 Mtrs. Capacity: 2 TPH to 60 TPH
4. Grain Movers (Belt Conveyers) as per IS Specification on Turnkey basis for conveying all types of solids. Range: 300 mm to 1900 mm belt width.

5. Grain Feeders (Screw Conveyers) Capacity: 0.5 TPH to 80 TPH. / Length: Upto 18 Mtr.
7. Slide Gates (Manual / Electric and Pneumatic type). Size: 120mm x 120mm to 400mm x 400mm
8. Two Way Diverters (Multiple Head Turn Heads) Manual / Electric and Pneumatic.

Eminence has strong technological foundation and years of practical experience and offers proven, reliable and economical conveying 'Customized' solutions to suit one's requirement. They are in this field since last 26 years and their remarkable products performance is proven by repeated orders from their valuable customers. Eminence Grain Dischargers can handle variety of free flowing material like Rice, Wheat, Dal, Corn, Malt, Soya, Sugar, Coffee, Grains, Sawdust. Their Chain type Grain Dischargers can handle various materials like Cement, Steel shots, Carbon Black, Ice Flakes etc. Eminence has supplied its products to Flour Mills / Rice Mills / Dal Mills / Seeds and Pulses Plants / Solvent extraction plants / Feed Mills on turnkey basis as per requirements. For Bag handling from factory to godown and then truck loading, the company offers complete system consisting of Portable Belt Conveyor,

Portable Bag Stackers and Truck Loaders.

The company has supplied their equipments for Malt & Barley handling at The Malt Company India Ltd., Gurgaon, Haryana, India. The Malt Company Ltd. is designed and supplied by SCHMIDT AG., Germany. They have also supplied the total material handling equipment required in the Rice Mills to some esteemed clients like M/s. L. T. Overseas Ltd., (Mfg. of 'DAAWAT' Basmati Rice), M/s. Satnam Overseas (Mfg. of 'KOHINOOR' Basmati Rice), M/s. Khushi Ram Bihari Lal Ltd. etc. In the Flour Milling Industry, they have supplied the total system to clients like M/s. Sunil Agro Ltd., Bangalore, M/s. Ankit India Ltd. Calcutta, M/s. Narasu's Roller Flour Mill, Salem, Tamil Nadu, M/s. Dewas Roller Flour Mill., Dewas etc. In the Soya Processing Industry, they have supplied the entire material handling system to M/s. Geepce Ceval Protiens & Investment Pvt. Ltd., Bundi, Rajasthan & M/s. Siddharth Soya, Akola & Adani Wilmar Ltd. at various locations. They have also supplied the Belt Conveyers to M/s. Thermax Ltd. and M/s. Cadbury Ltd.

Their client list has various companies in food processing industry like M/s. Buhler India (P) Ltd., Bangalore, M/s. Satake Corporation New Delhi, M/s. Desmet Chemfood Engineering Pvt. Ltd. Bangalore, M/s. Alfa Laval India Ltd., M/s. Praj Industries, M/s. B.G. Shirke for Silo Loading & Unloading, M/s. Andritz India Ltd. in field of Animal & Cattle Feed. The company has completed the projects successfully in various parts of country in Andhra Pradesh, Madhya Pradesh, Uttar Pradesh, Karnataka, Rajasthan, Haryana, Tamil Nadu, Kerala, Maharashtra and many other states. They have also exported to countries such as Malaysia, Ghana, Zimbabwe, South Africa, Australia, Egypt, Nigeria, Tanzania, Ivory Coast, Sri Lanka, Bangladesh, Nepal and Pakistan. They have also exported complete Rice Mill project in United Kingdom & Netherland. Eminence Equipments are always known for applying innovative and best of technology.

Aadvik Foods

Promises premium dairy products without compromising the quality

Founded with a purpose to support local camel farmers and herders, and to save the dwindling camel population, Aadvik Foods is India's pioneering brand in the camel milk and goat milk segment. By bringing the unique benefits of non-bovine milk to the global forefront, they aim to provide high-quality, healthy, and sustainable dairy alternatives that cater to the evolving needs of modern consumers. Established in 2016 by Mr. Hitesh Rath, Aadvik Foods has grown to become a trusted name in premium dairy products. Aadvik Foods began as a small venture aiming to bridge the gap between ancient traditions and modern nutrition. With the backing of extensive research and collaboration with local camel herders and goat farmers, we introduced India's first camel milk powder, setting the benchmark for innovation in the non-bovine dairy sector. Over the years, their product portfolio has expanded, reaching customers across 30+ countries, making us a trusted name in premium dairy alternatives.

Product Portfolio:

Aadvik Foods offers a diverse range of products made from camel and goat milk, each crafted to retain maximum nutritional value. Each product is unique in its own way in terms of its health benefits, its nutrient profile, etc. Their offerings include:

- **Camel Milk Products:** Powder, chocolates, cookies, and skincare products such as moisturizers, known for their rich nutritional profile and therapeutic properties.
- **Goat Milk Products:** Powder, chocolates, and other specialty items, celebrated for their easy digestibility and health benefits.
- **Bovine Colostrum Products:** High-quality bovine colostrum powder designed to boost immunity and overall health.
- **Donkey Milk Products:** Skincare solutions leveraging the exceptional properties of donkey milk to promote healthy and radiant skin.
- **Specialty Products:** Innovative creations like lactose-free options, flavored powders, and functional dairy alternatives that cater to varied consumer preferences.

Supporting Camel Farmers and Herders:

At the heart of Aadvik Foods' mission is their commitment to supporting local camel farmers and herders.

Hitesh Rath
Aadvik Foods

By creating a sustainable demand for camel milk, the company empowers these communities economically while preserving their traditional way of life. The company's partnerships ensure fair pricing, ethical sourcing, and the promotion of sustainable camel herding practices. Through this initiative, they aim to uplift marginalized communities and contribute to their social and economic development.

Benefits of Camel and Goat Milk:

Camel Milk:

- Naturally rich in vitamins and minerals such as Vitamin C, iron, and calcium.
- Contains immune-boosting properties with a high concentration of antibodies.

high concentration of antibodies.

- Low in lactose and easier to digest, making it ideal for individuals with lactose intolerance.
- Supports gut health and aids in managing conditions like diabetes and autism.

Goat Milk:

- High in digestible proteins and essential fatty acids, making it a gentle alternative for sensitive stomachs.
- Packed with nutrients like magnesium, calcium, and potassium.
- Known to boost immunity and promote healthy skin.
- A natural source of probiotics, enhancing gut health.

Future Plans:

As industry leader in the non-bovine dairy sector, Aadvik Foods is committed to innovation and sustainability. Their roadmap includes:

- Expanding their product range to include more functional and fortified dairy products.
 - Strengthening their collaborations with local herders to empower rural communities and ensure ethical sourcing.
 - Venturing into new global markets to promote the benefits of camel and goat milk worldwide.
 - Advocating for sustainable dairy practices and educating consumers about the nutritional superiority of non-bovine milk.
- Aadvik Foods is more than just a brand. They align themselves with the tagline of Explore Beyond Normal. By combining tradition with modern innovation, they continue to redefine the dairy industry, one product at a time.
